

# BESPOKE LIGHT

Since man-made light was invented someone somewhere has wanted something different, unique or bespoke from it.

Whether this be for comfort, impact, aesthetic to warn or warm; the human race constantly wants an alternative visual.

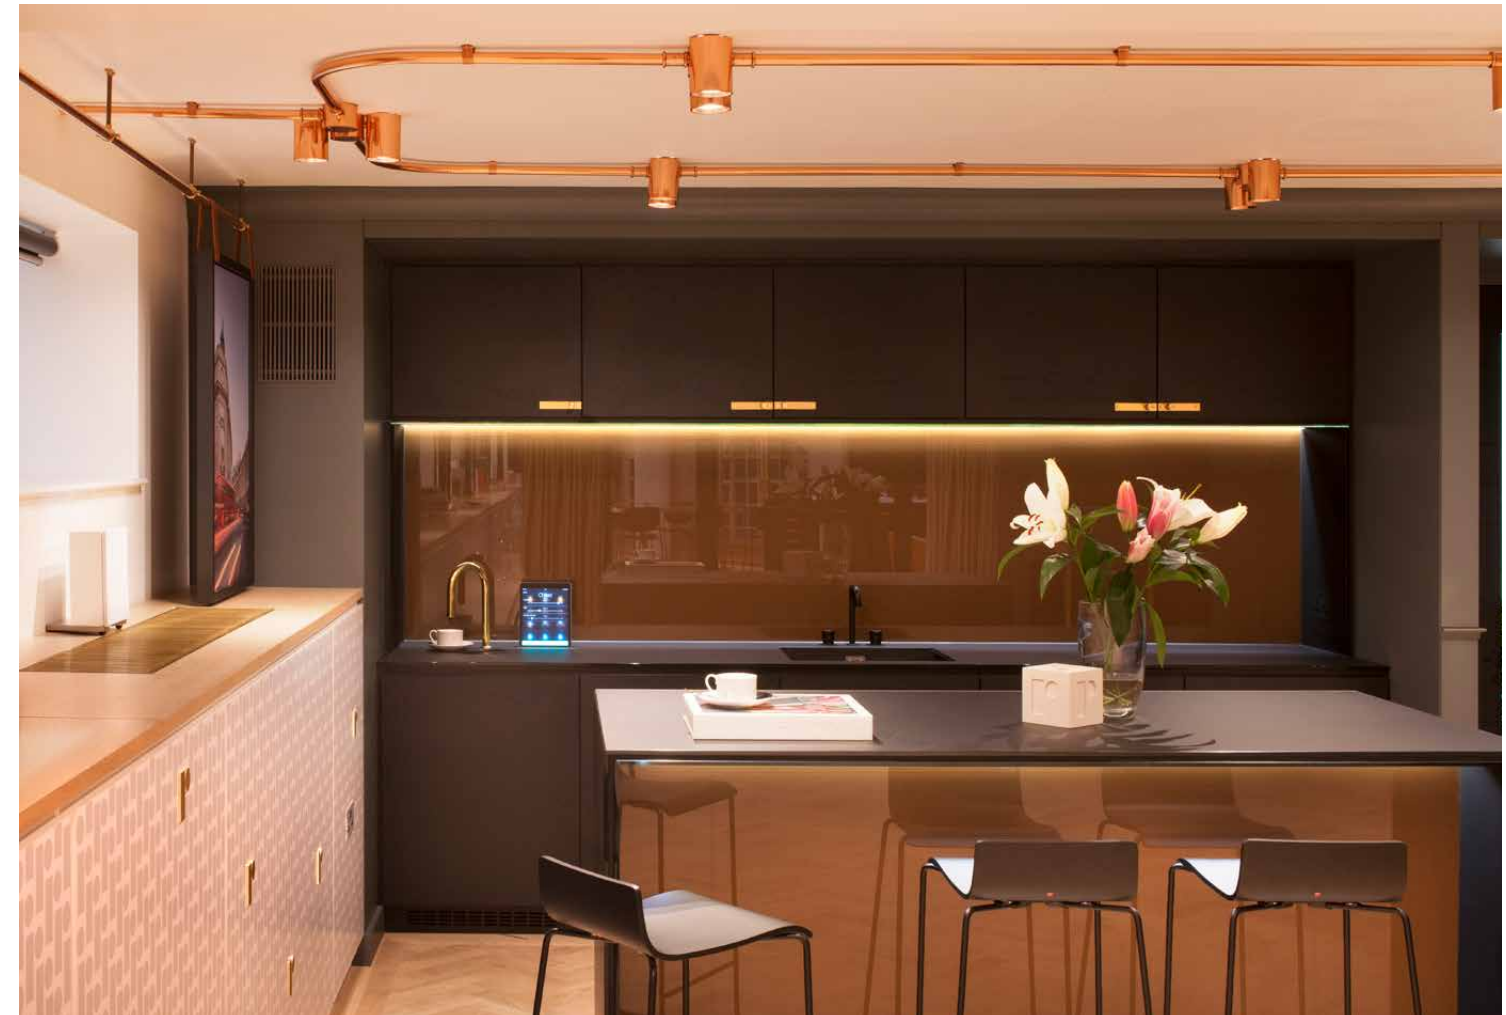

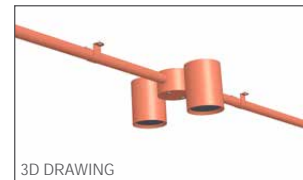

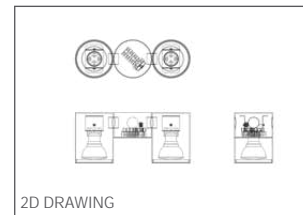

Add the professions of architecture, design and consulting and the desire magnifies. These professionals have the enviable ability to visualise an idea and transfer to 2D or 3D sketches and drawings. And that is where FUTURE Designs comes to the forefront.

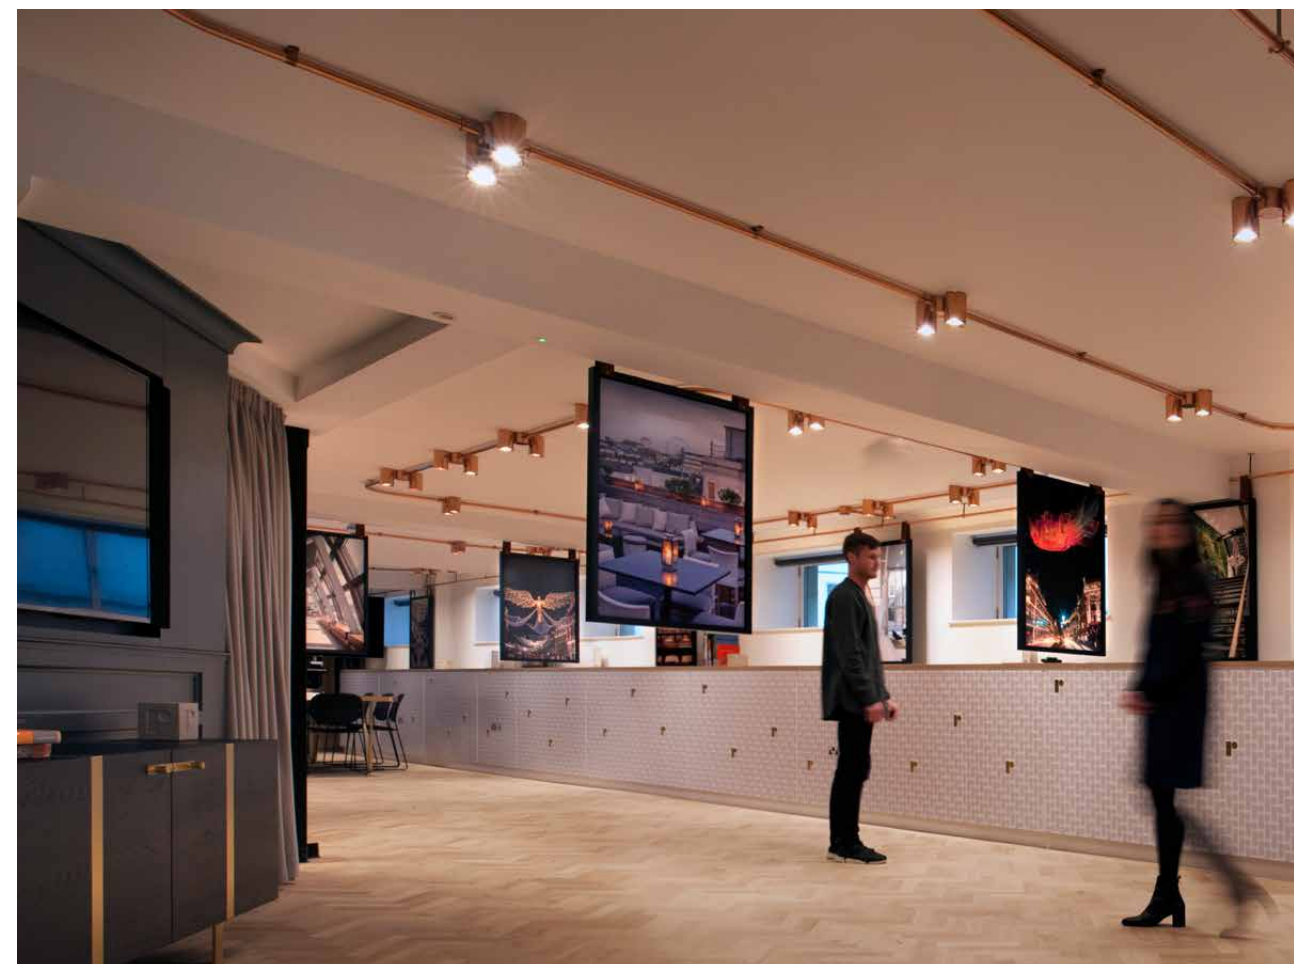

Our experience and expertise is world class in turning concept to reality, in having the ability and skill sets to interpret the visual and provide a simile that not only is aesthetically correct but more importantly is fit for purpose, sustainable and maintainable.

This book is produced to offer a visual of what has been achieved by us. It is a snapshot of our ability to turn your concept into reality.

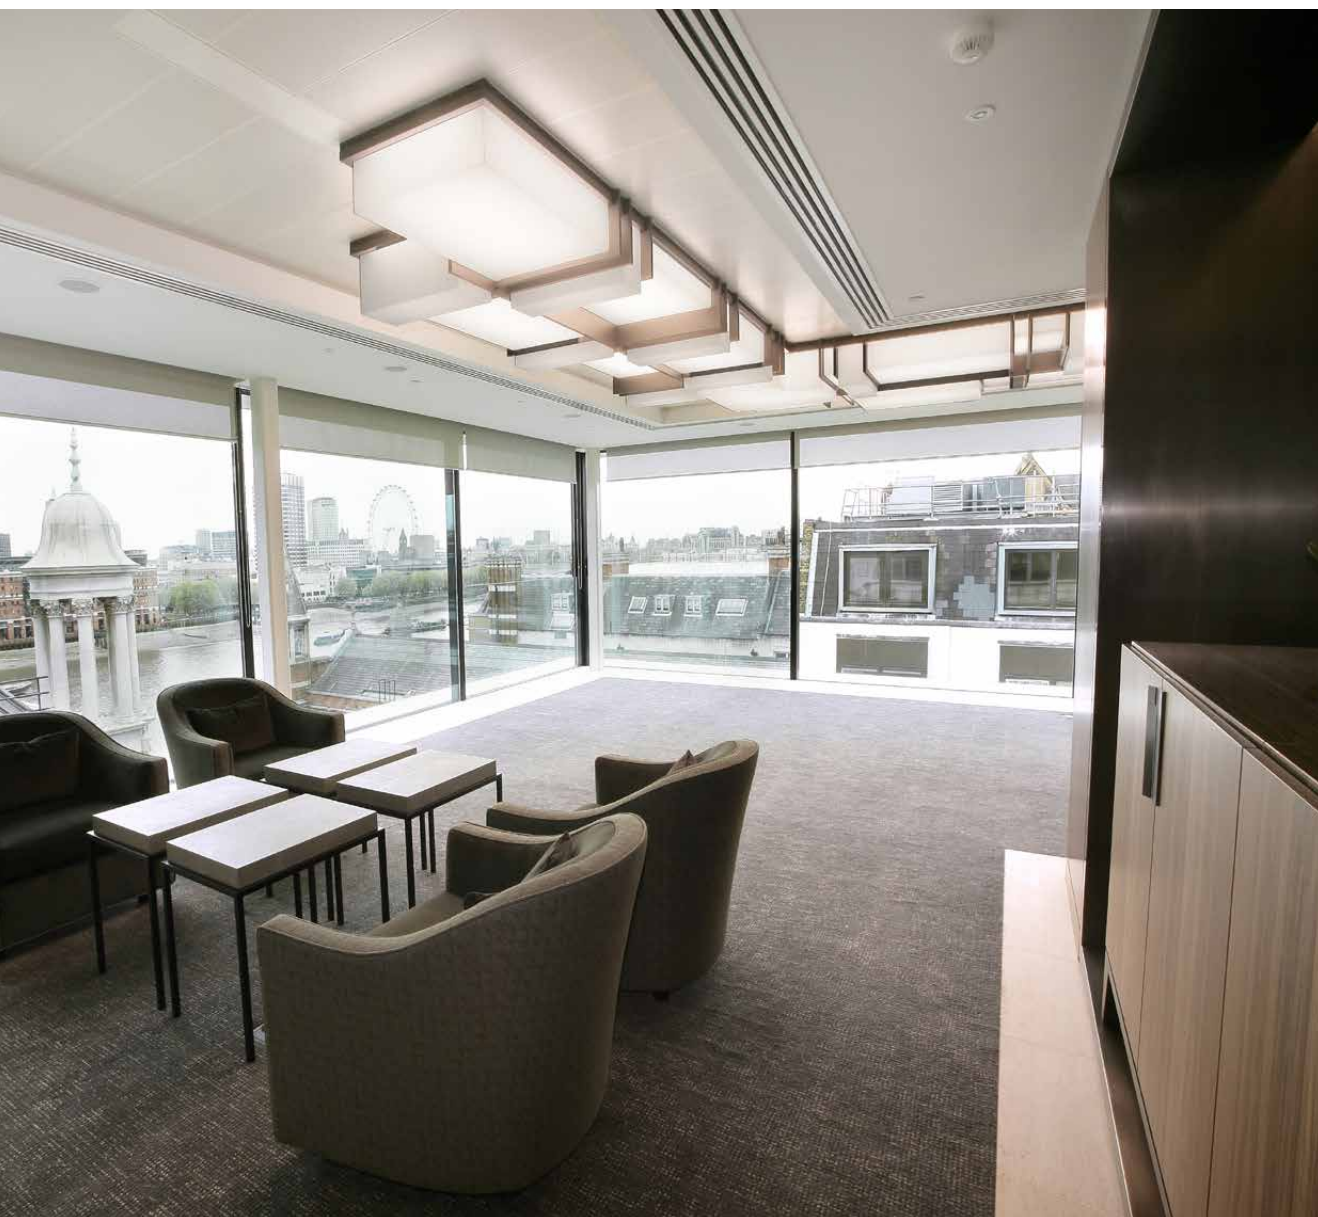

We have invested in an all-encompassing 3D printing system to allow for quick real time development of products.

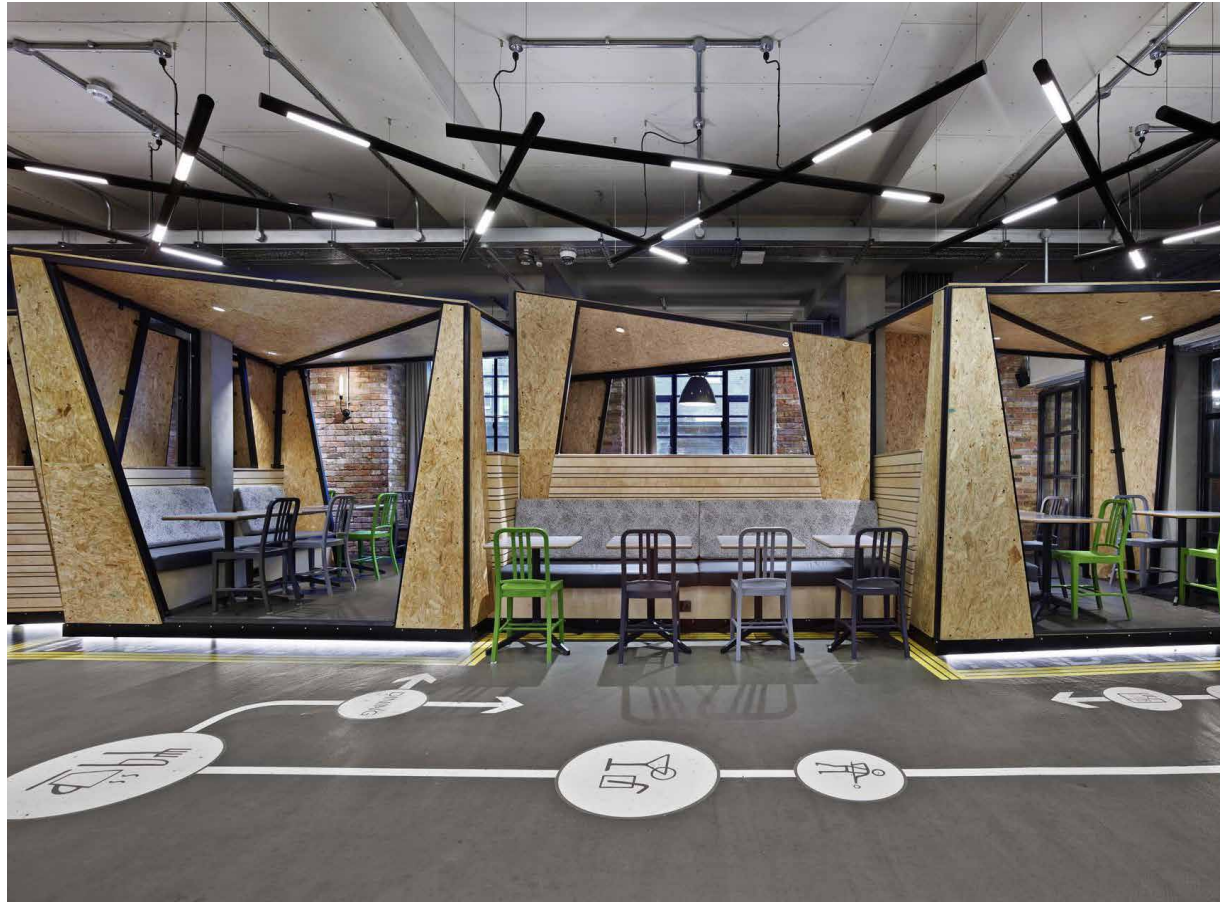

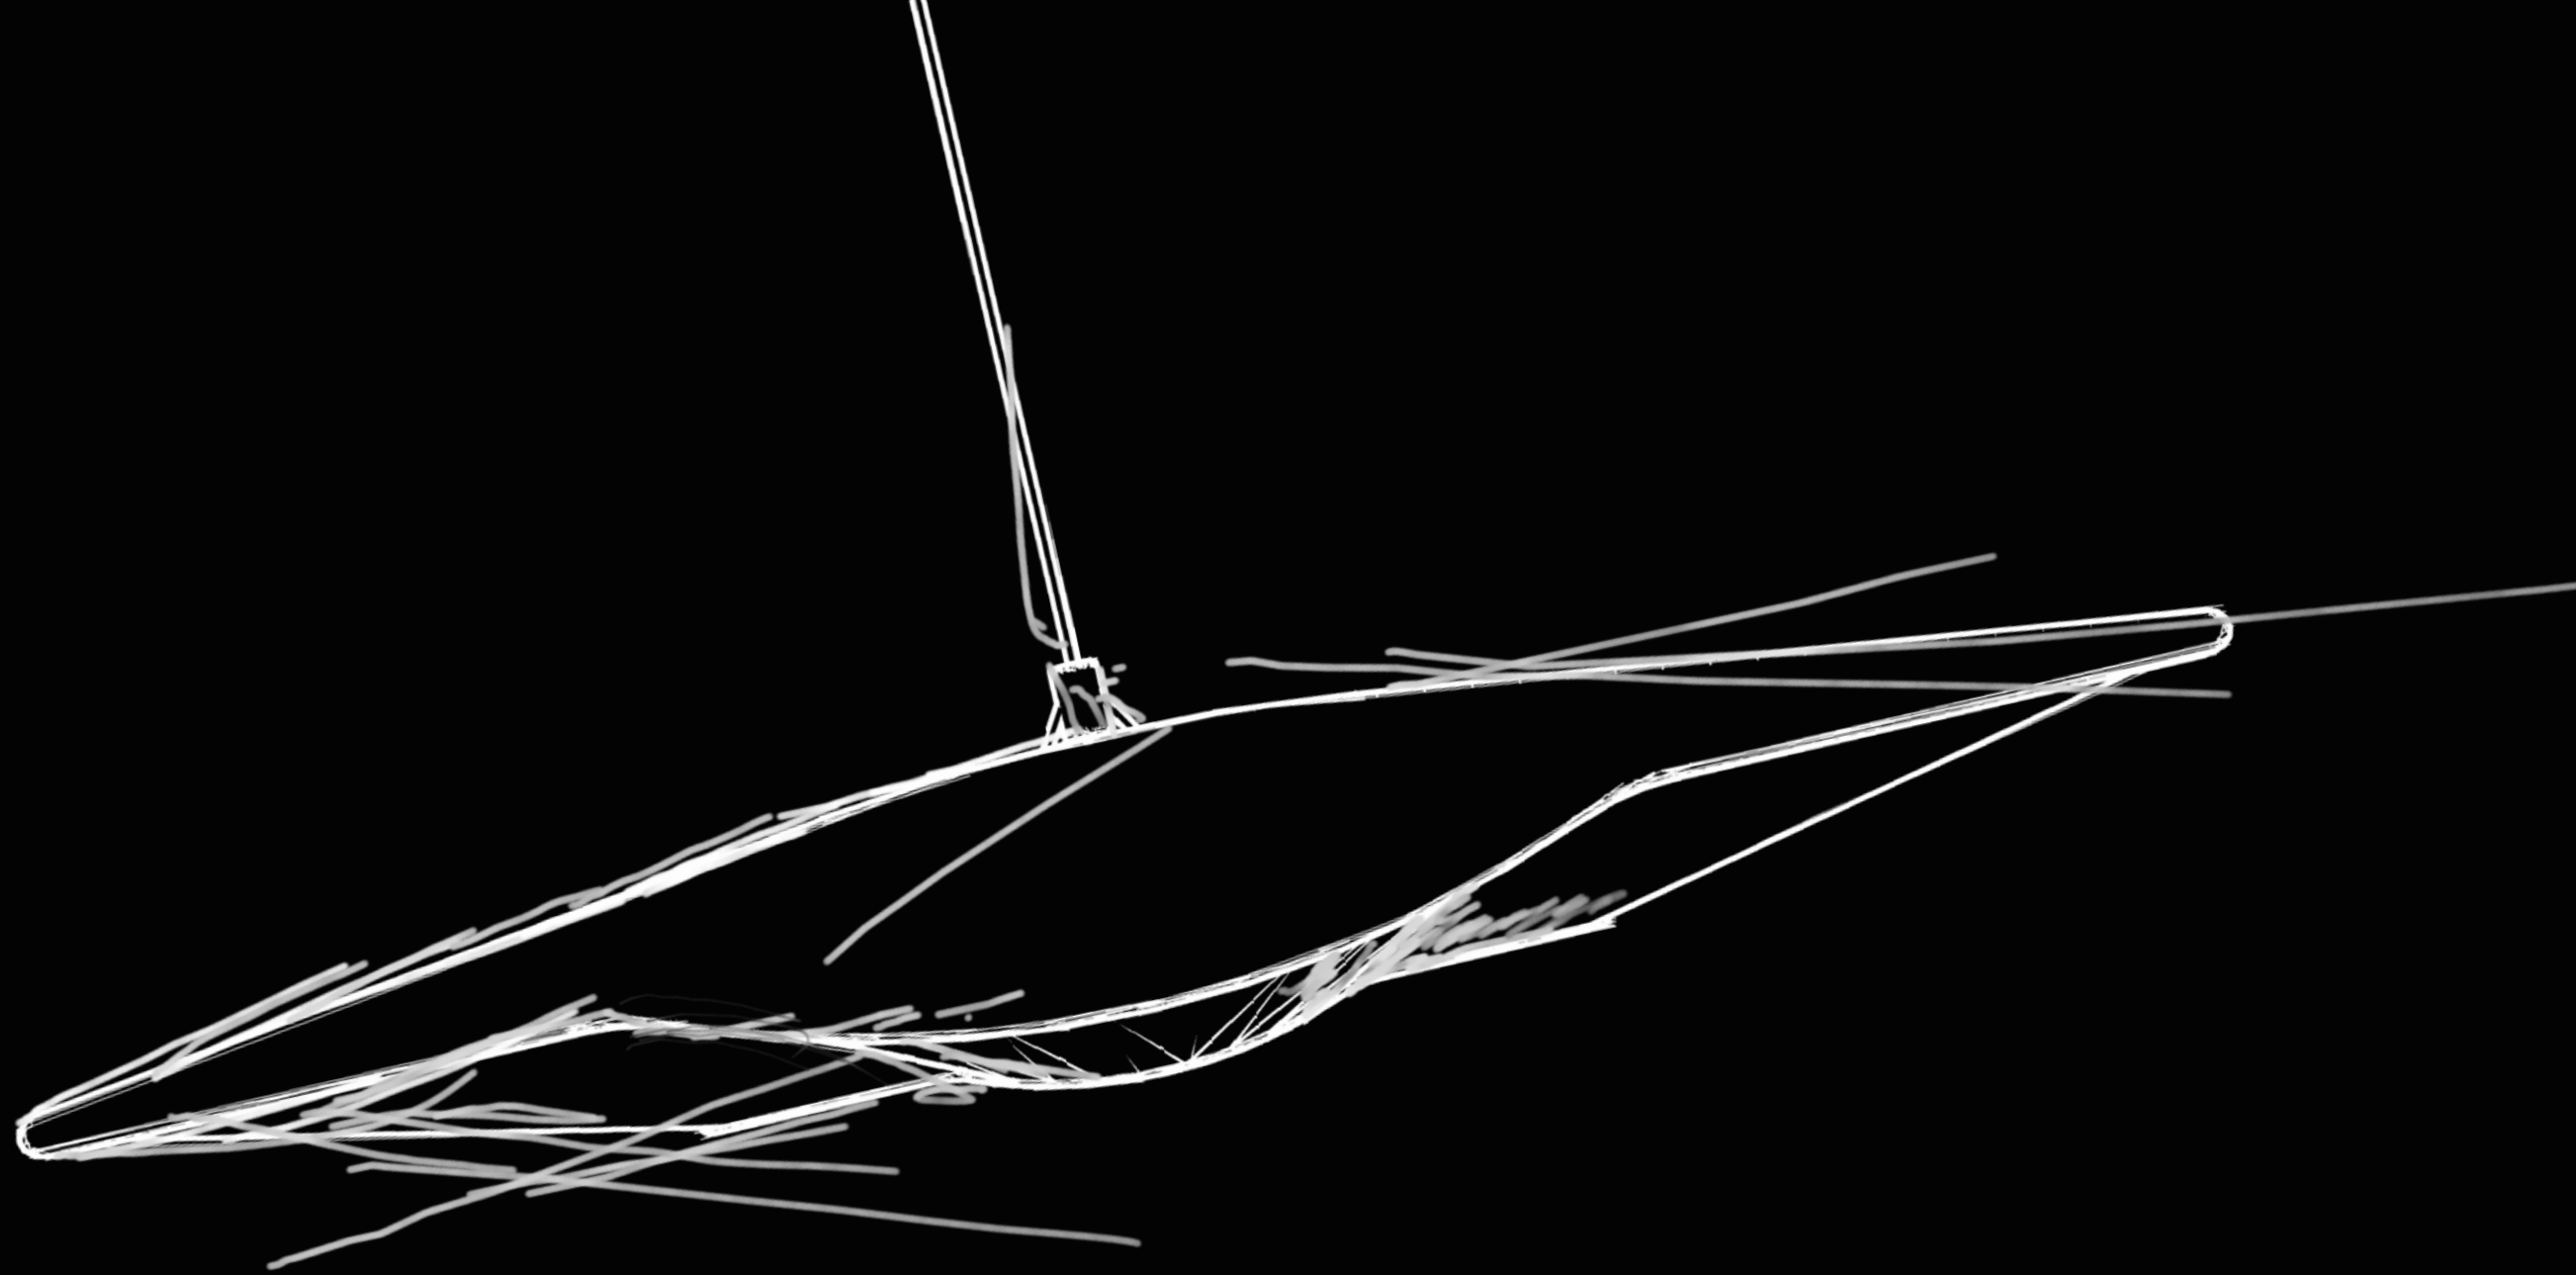

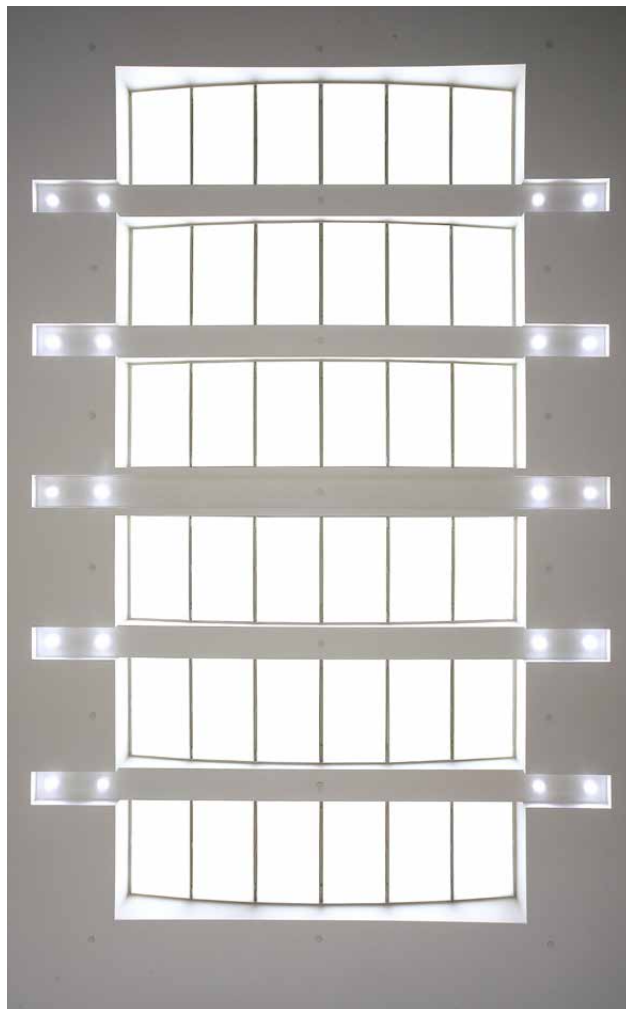

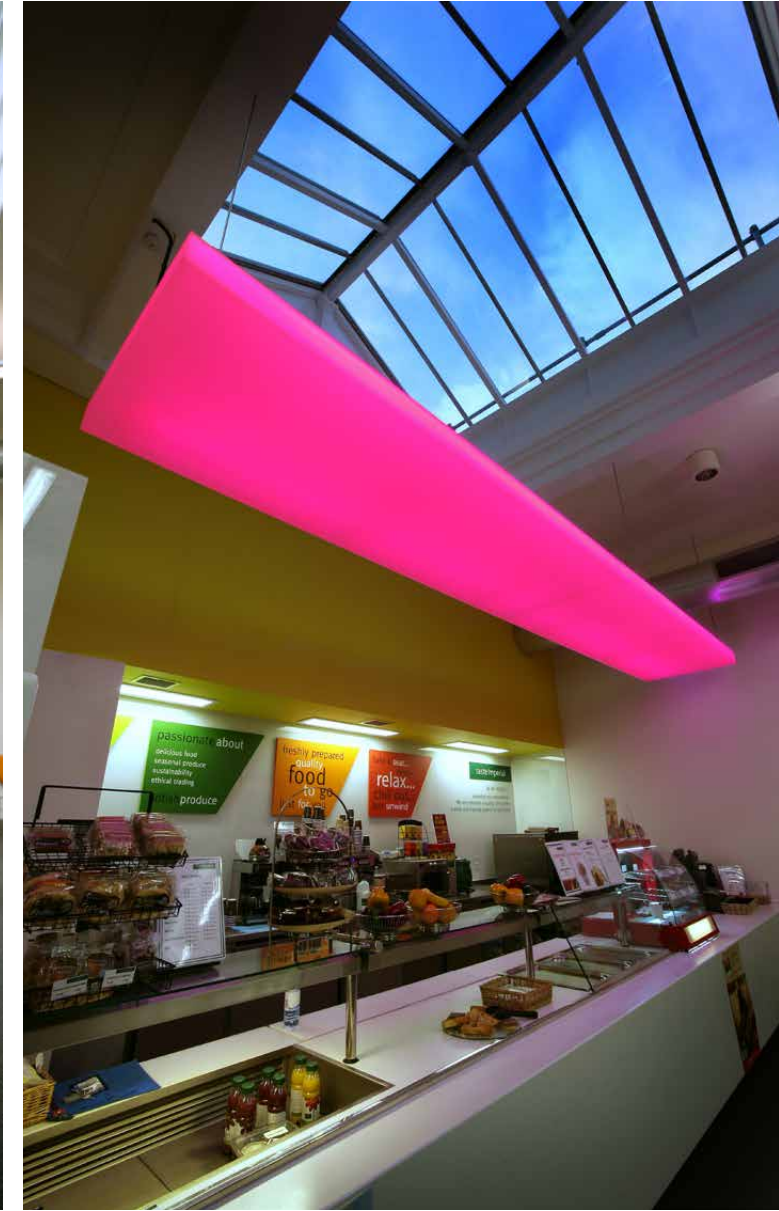

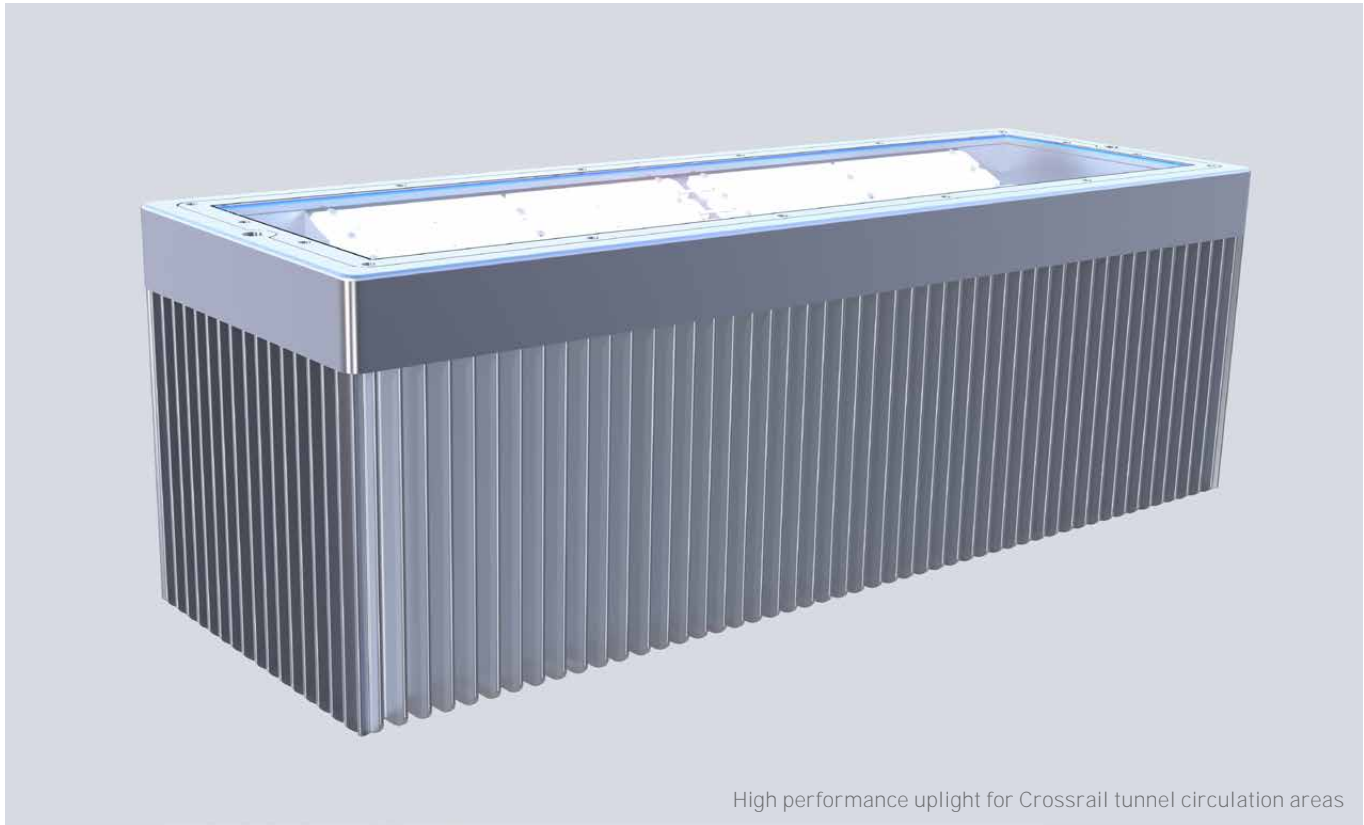

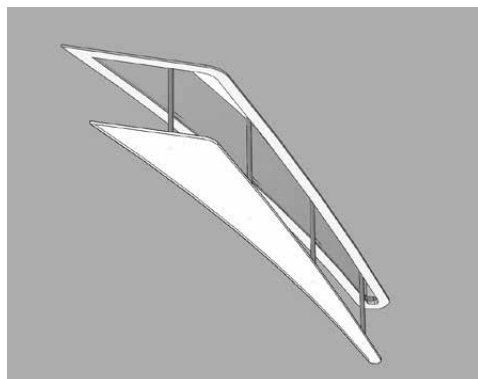

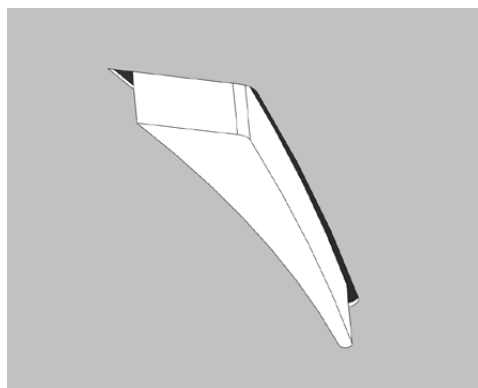

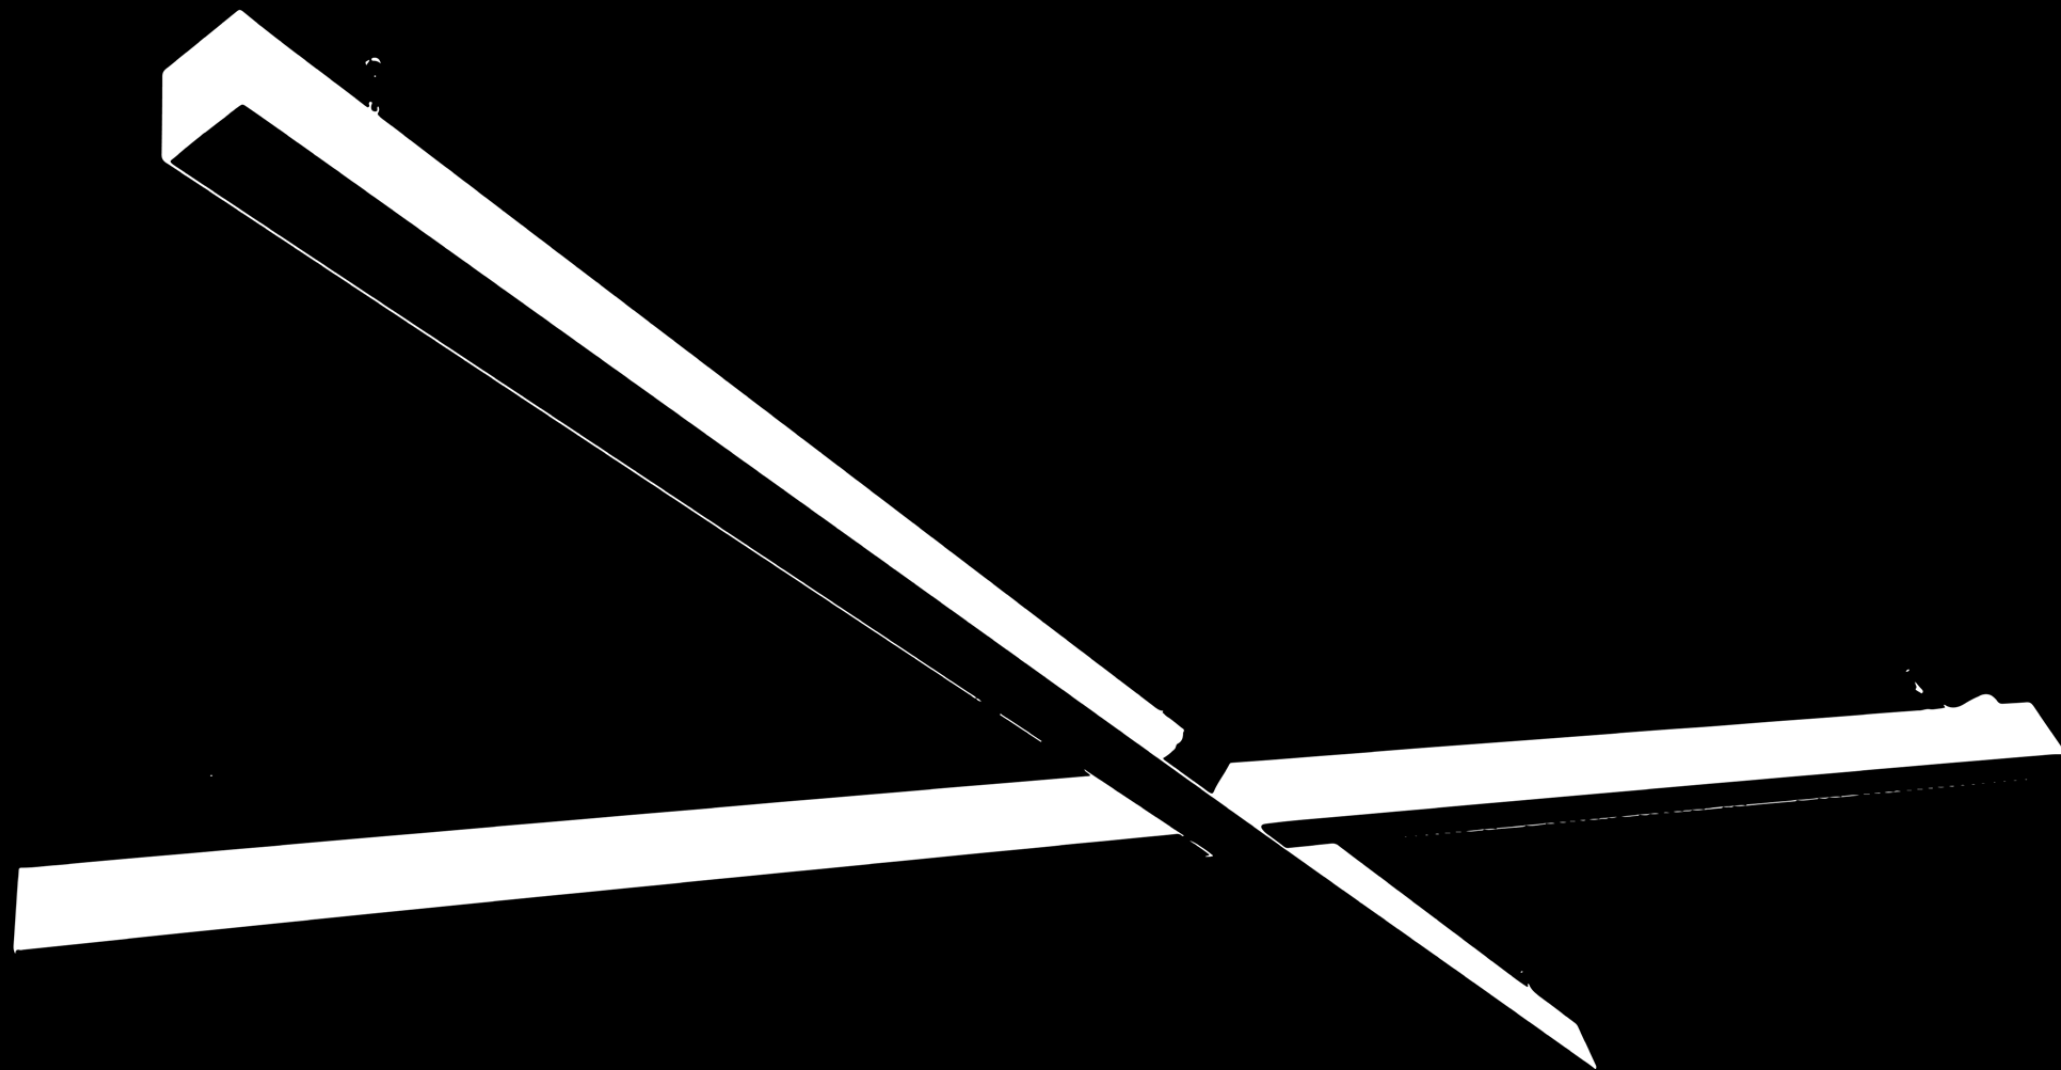

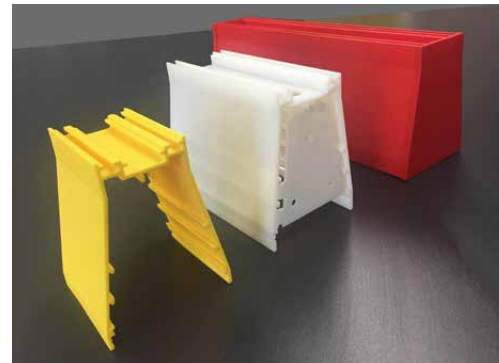

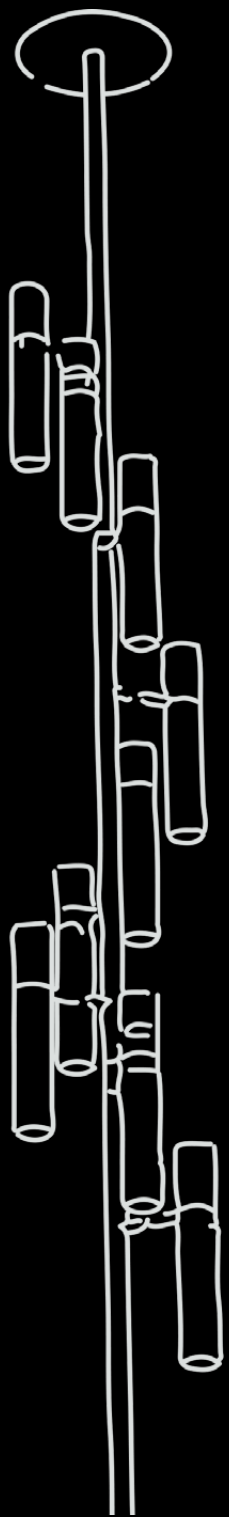

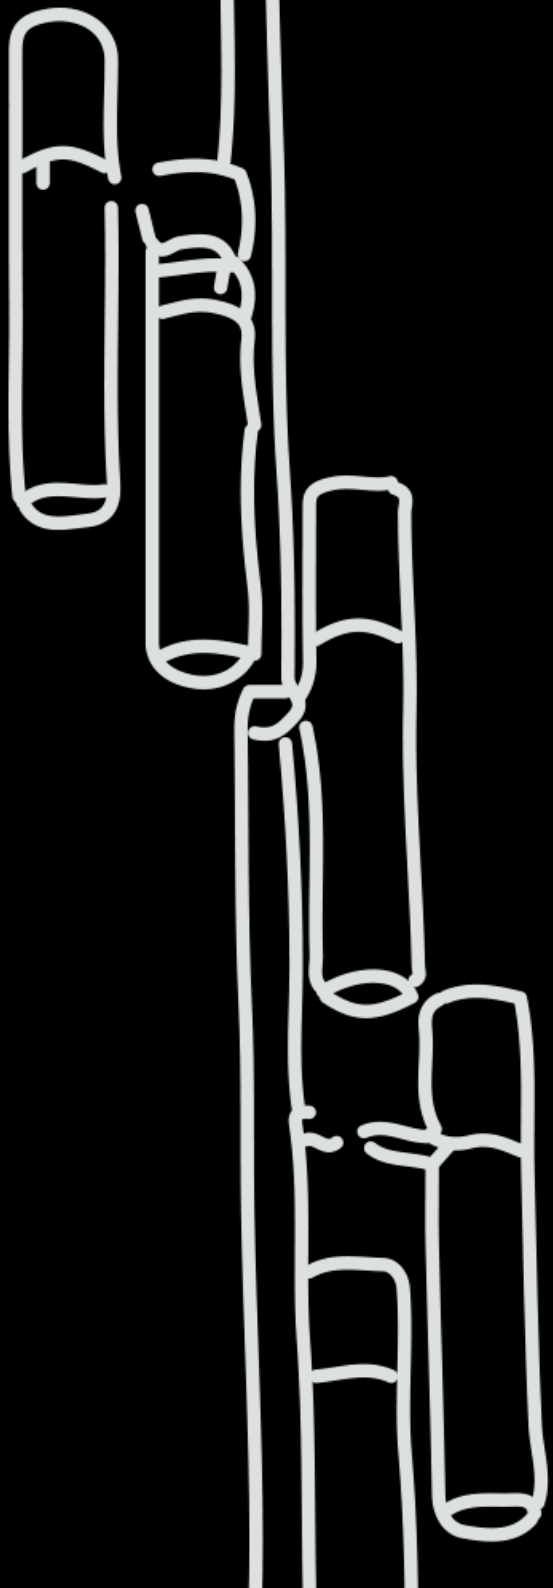

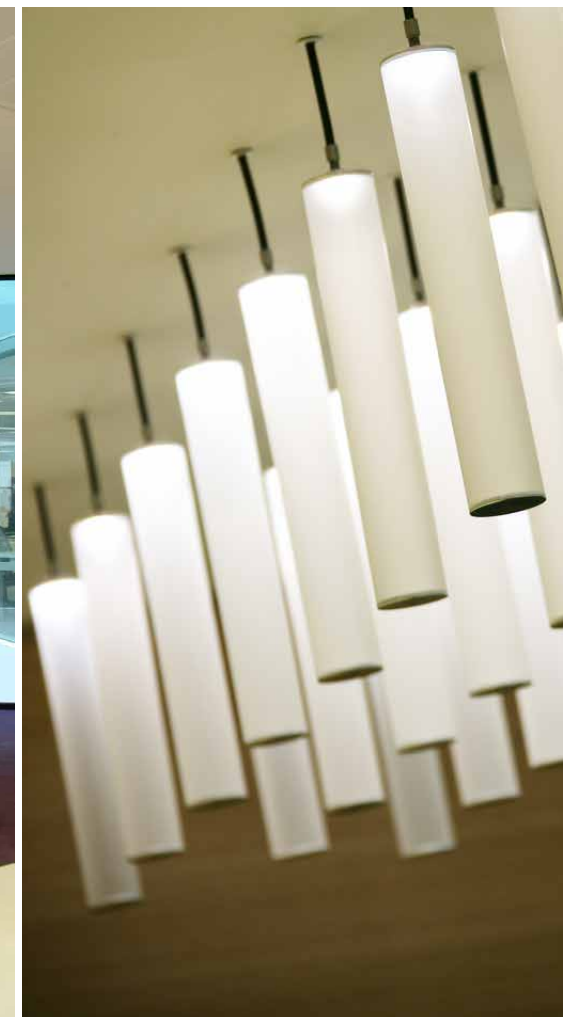

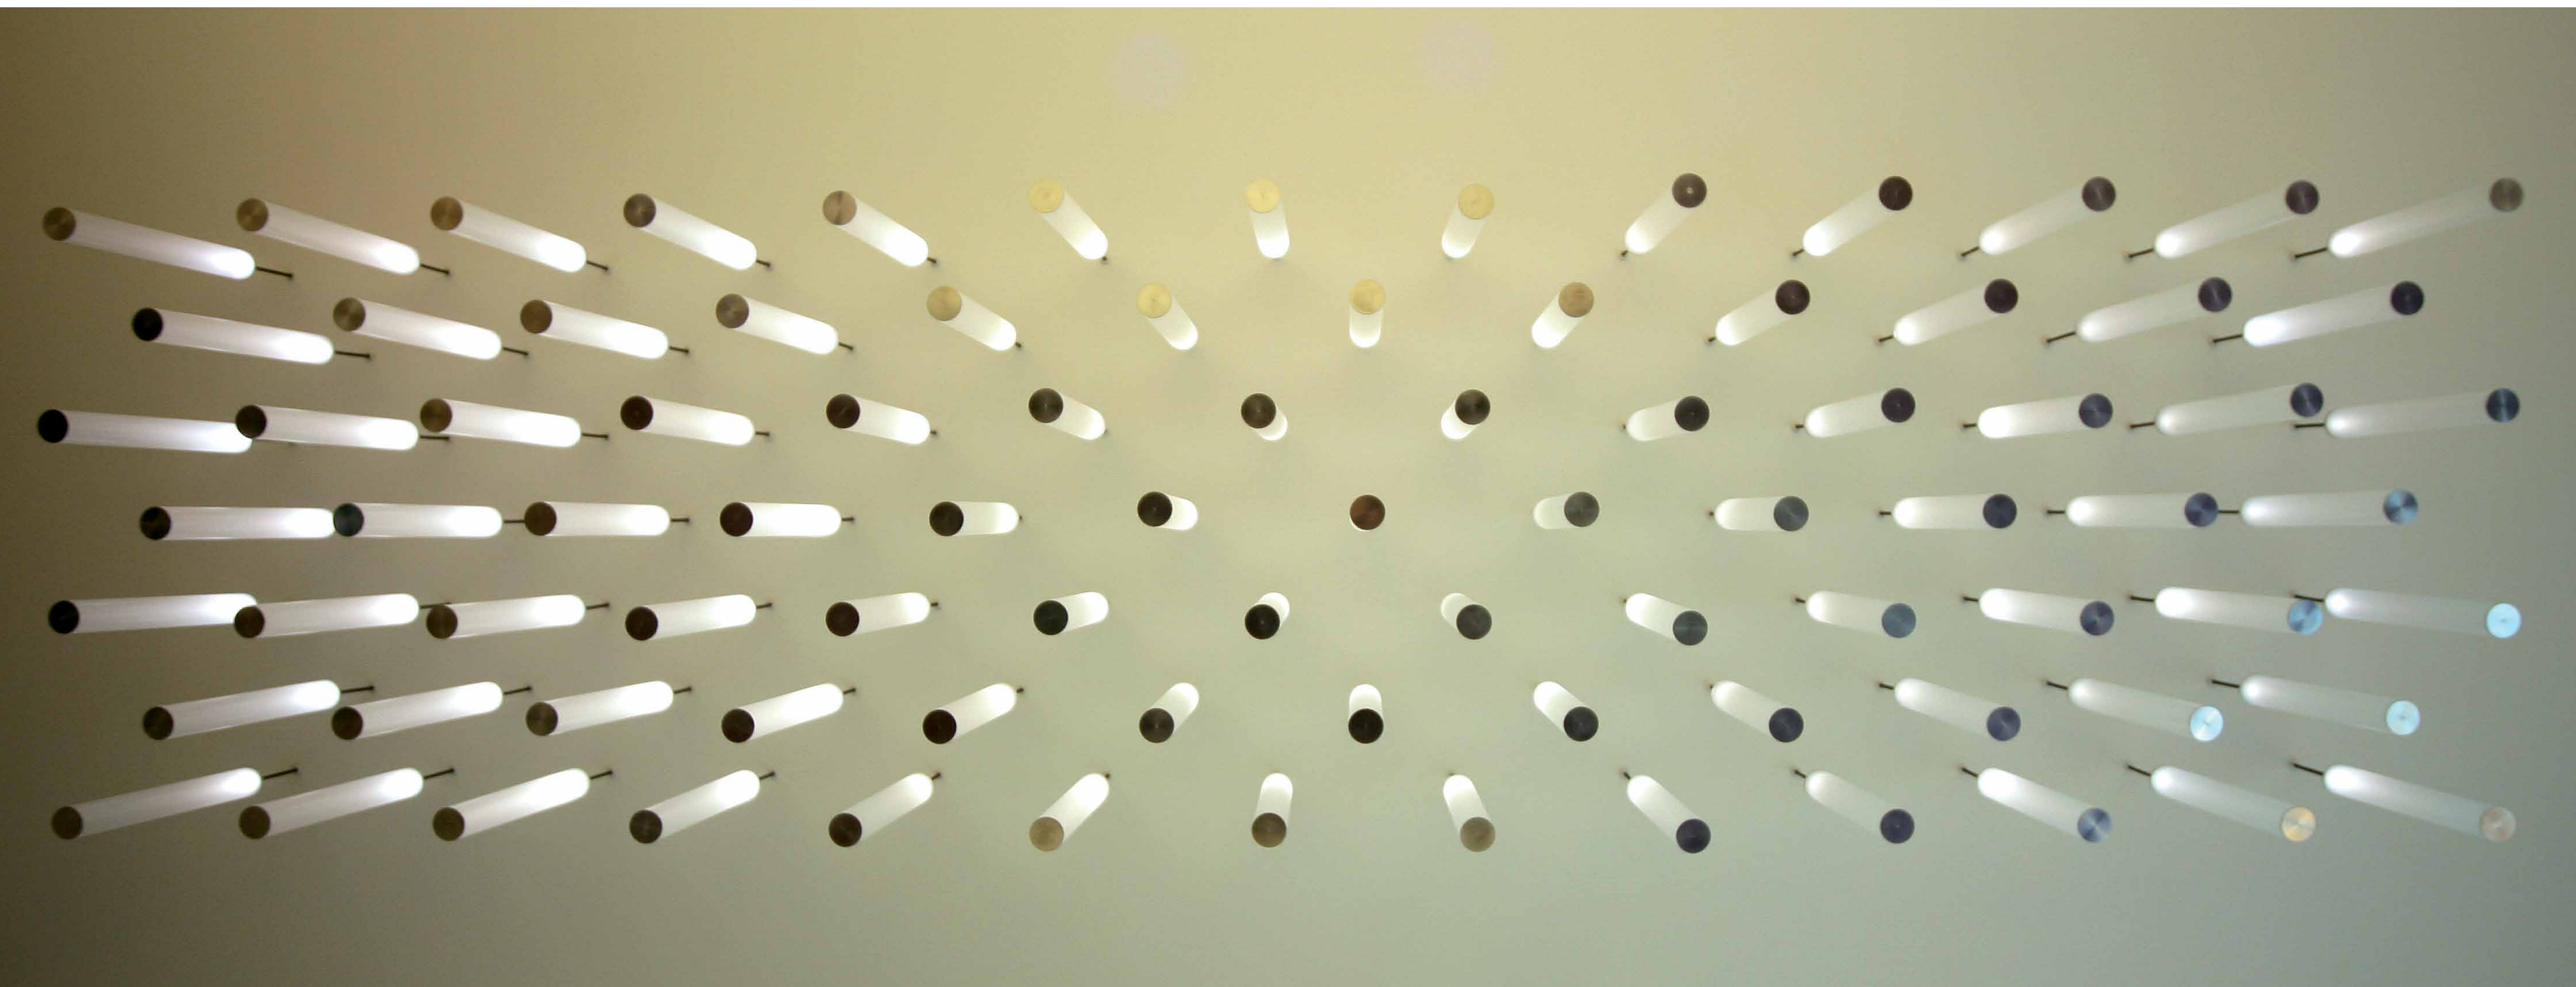

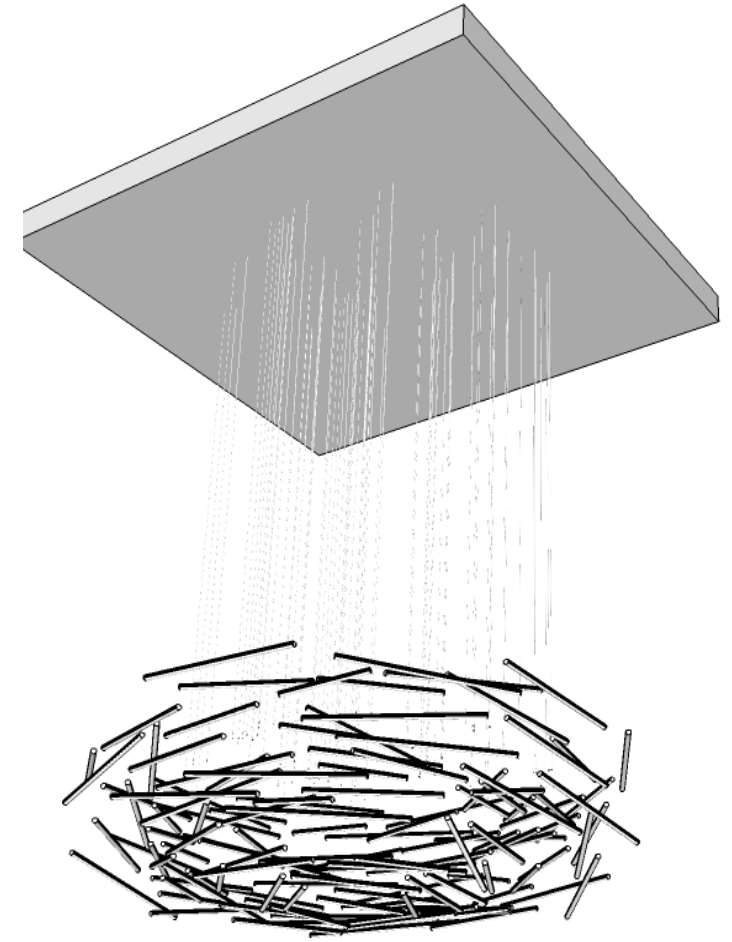

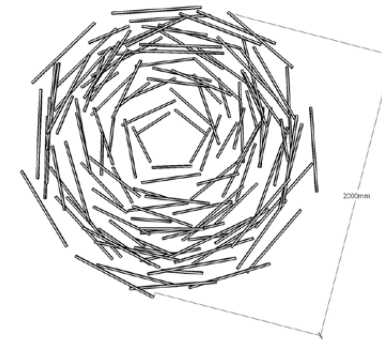

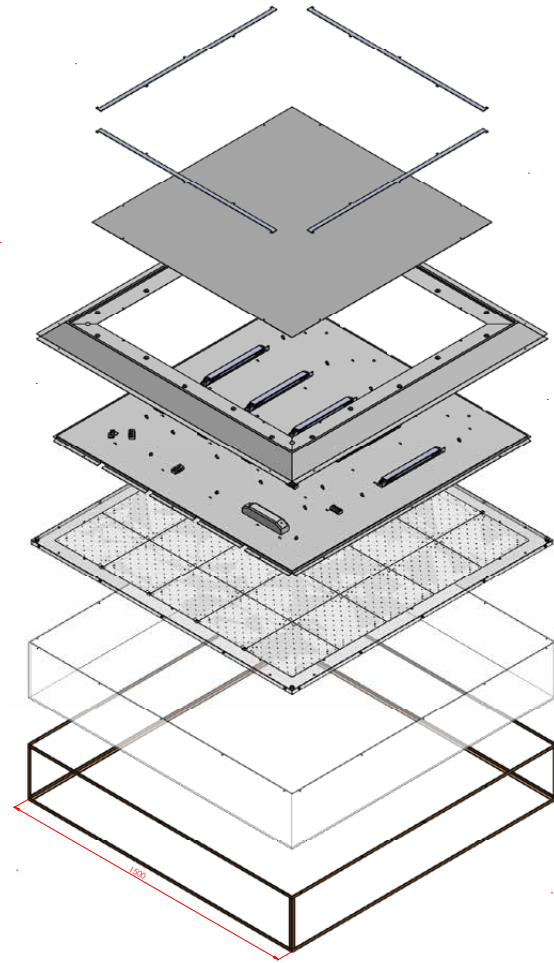

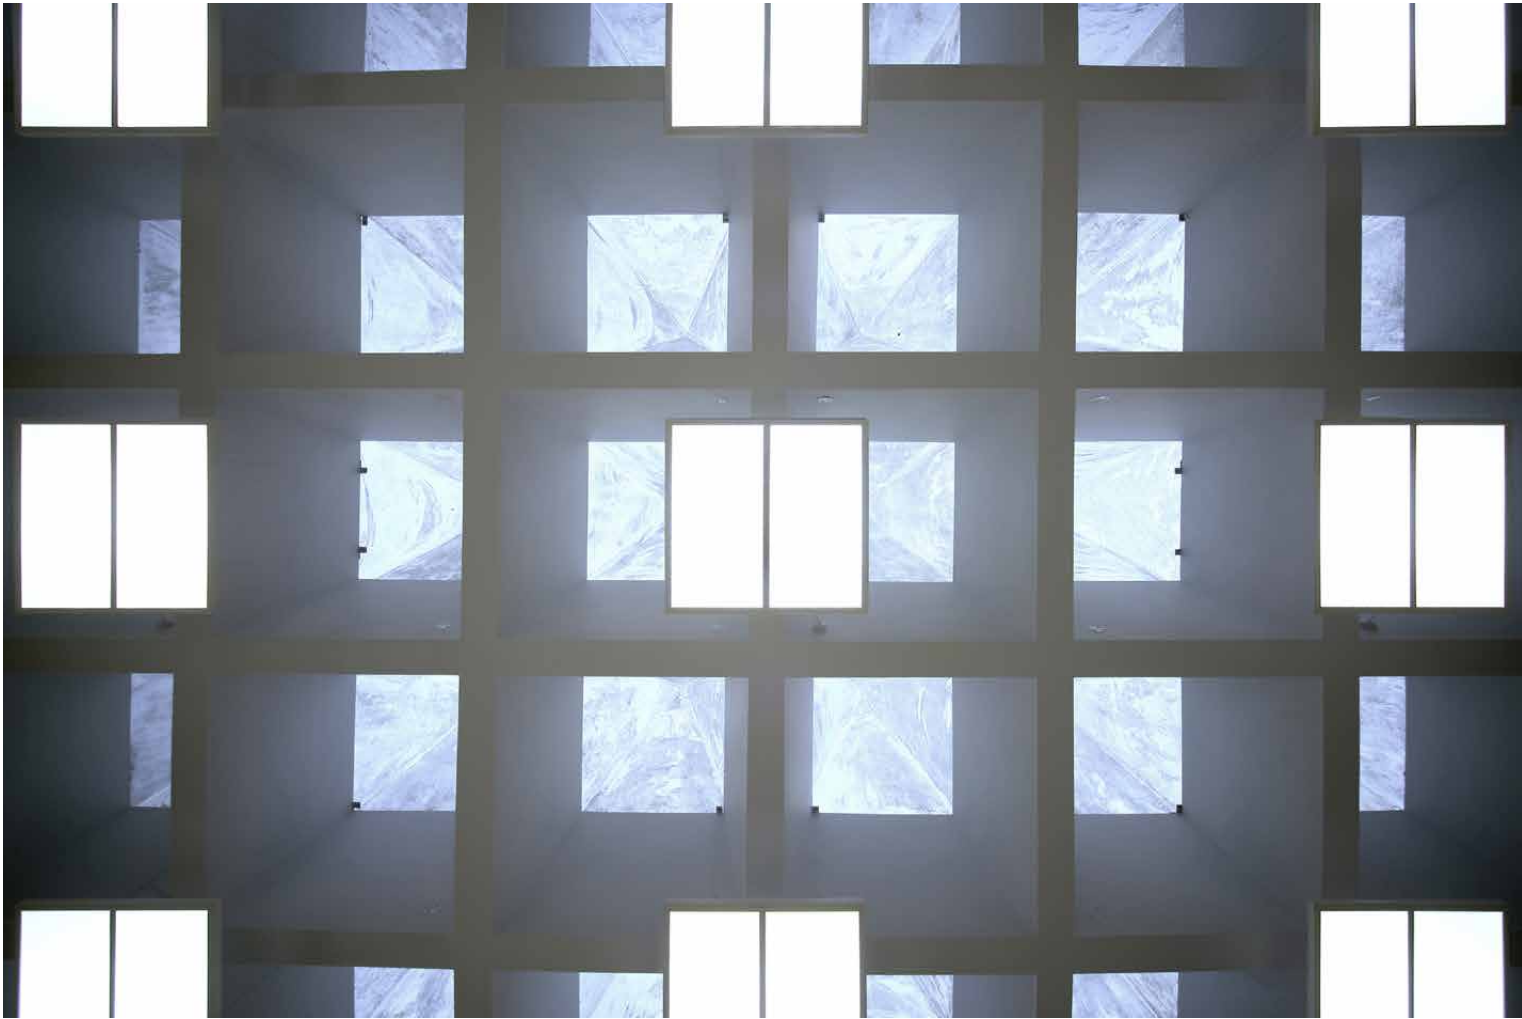

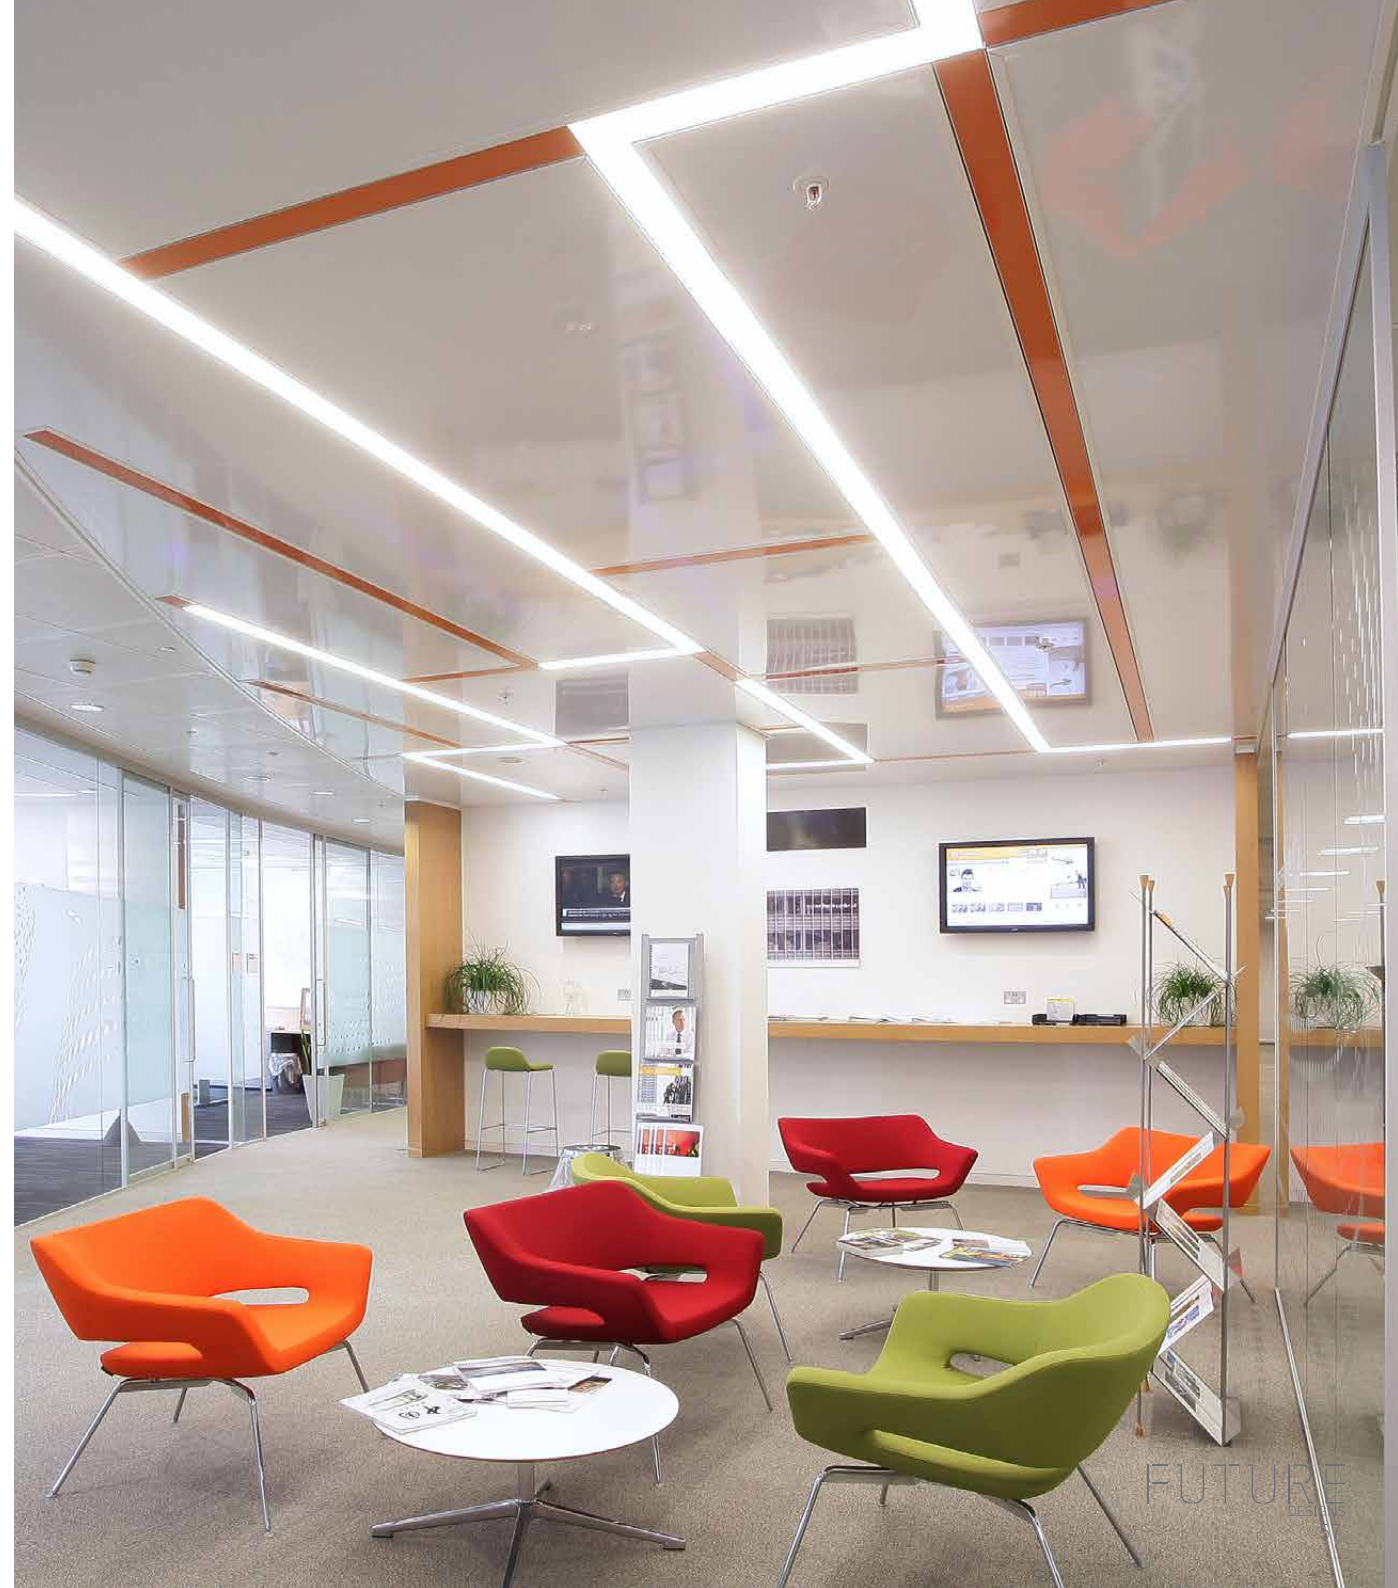

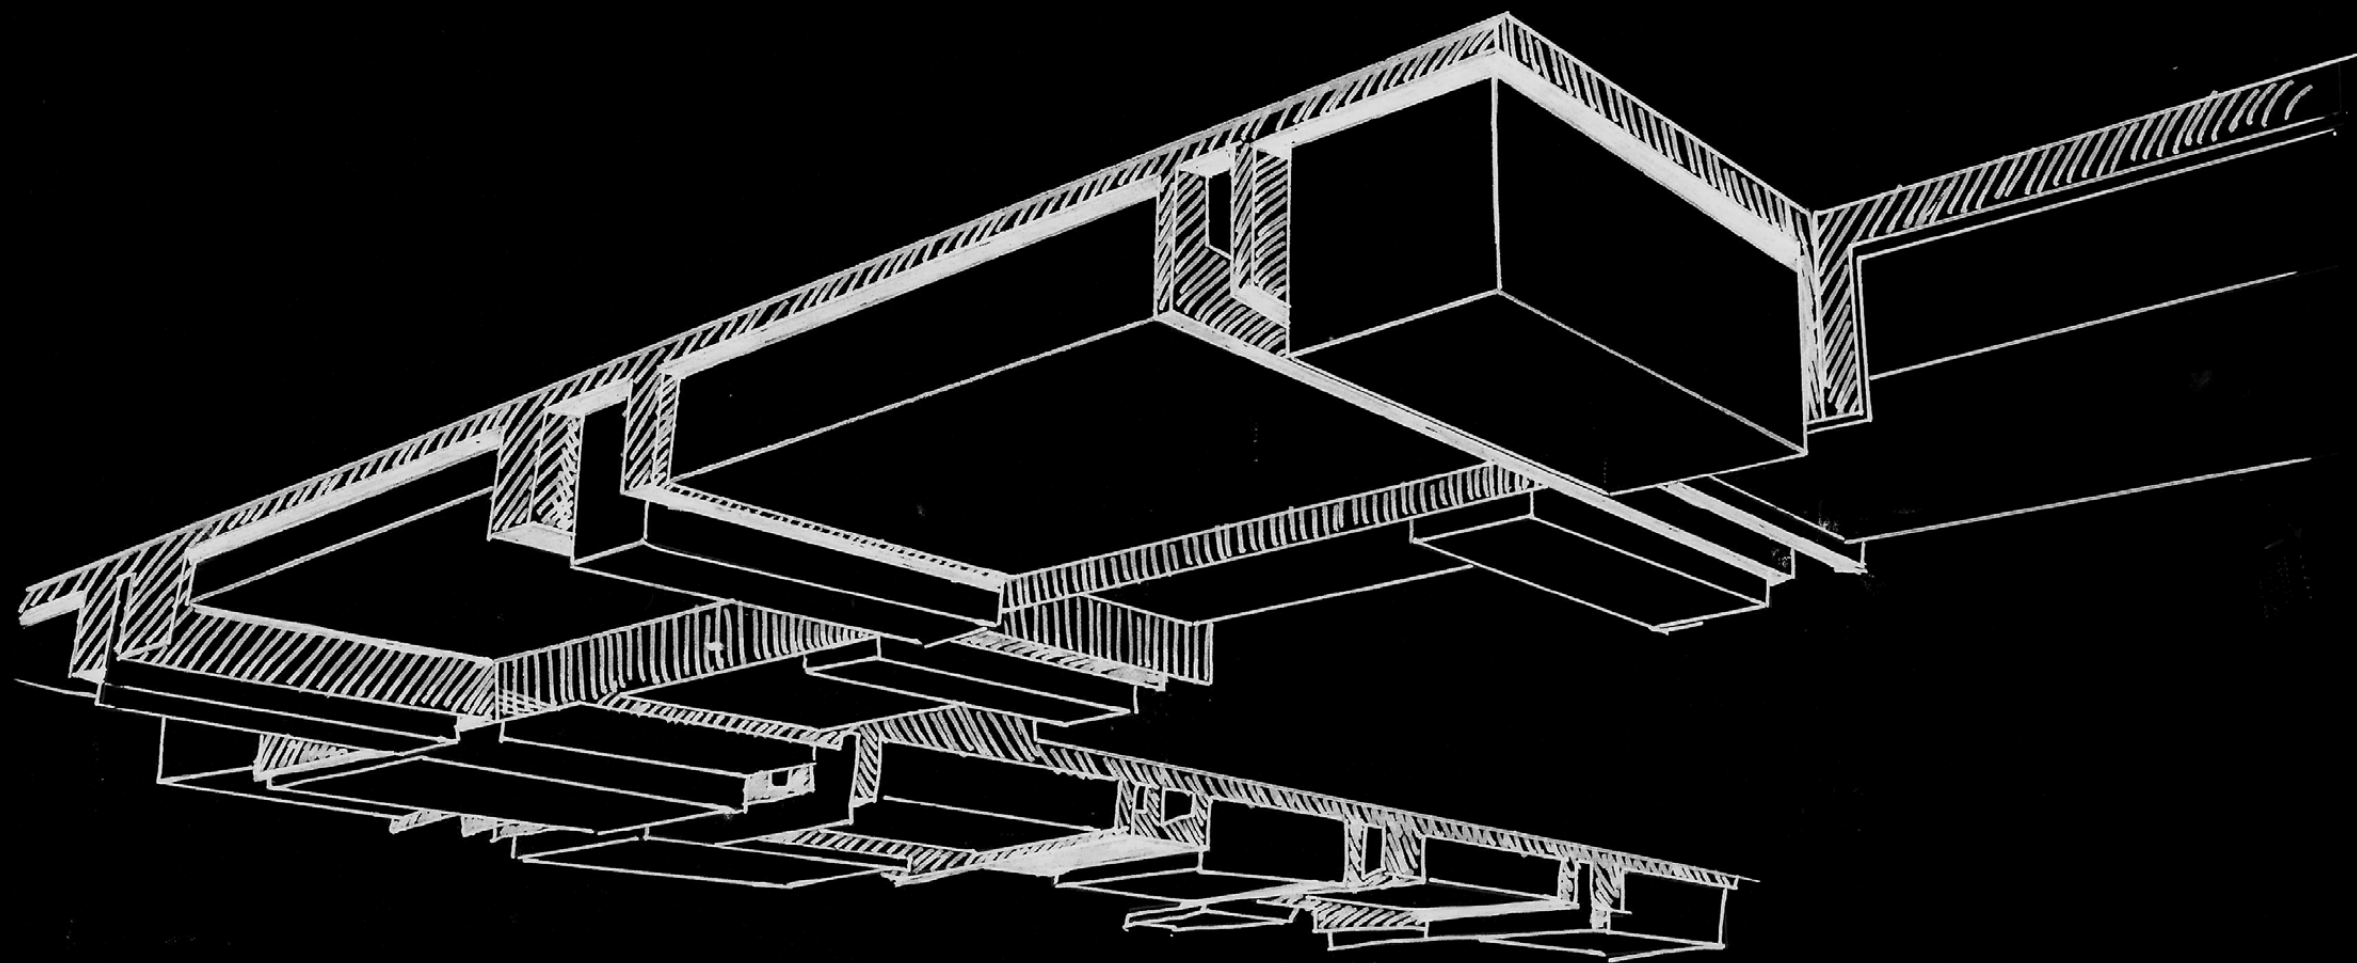

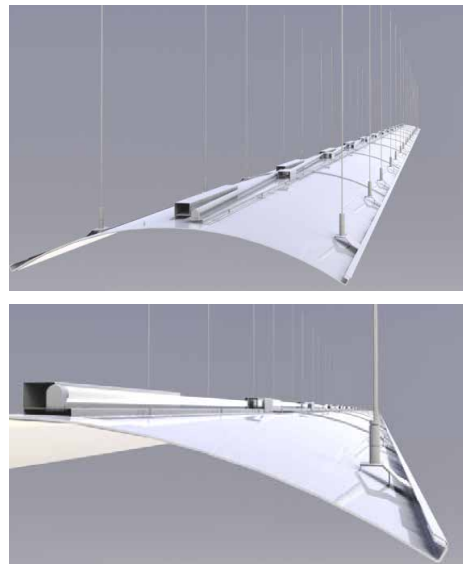

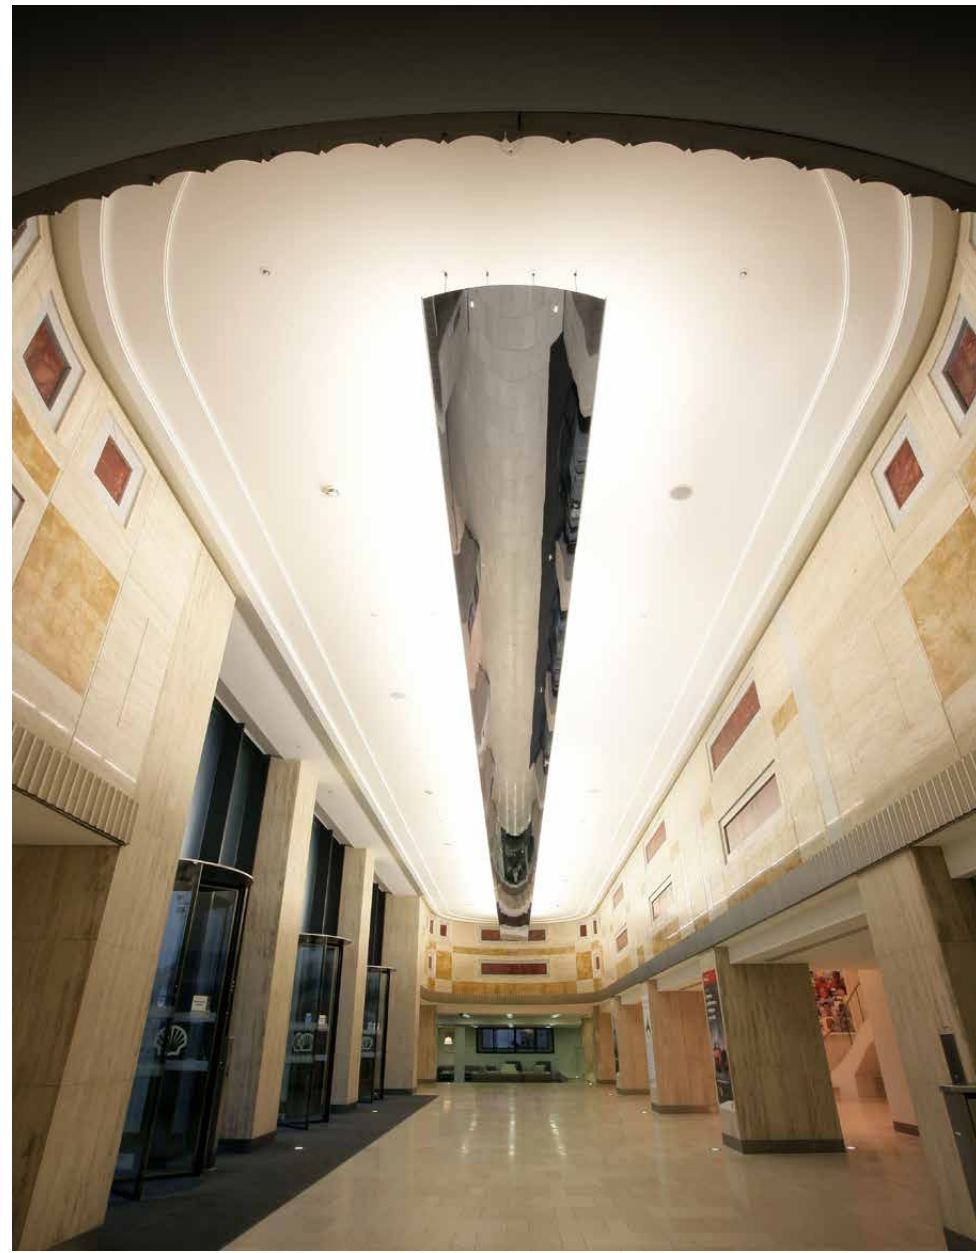

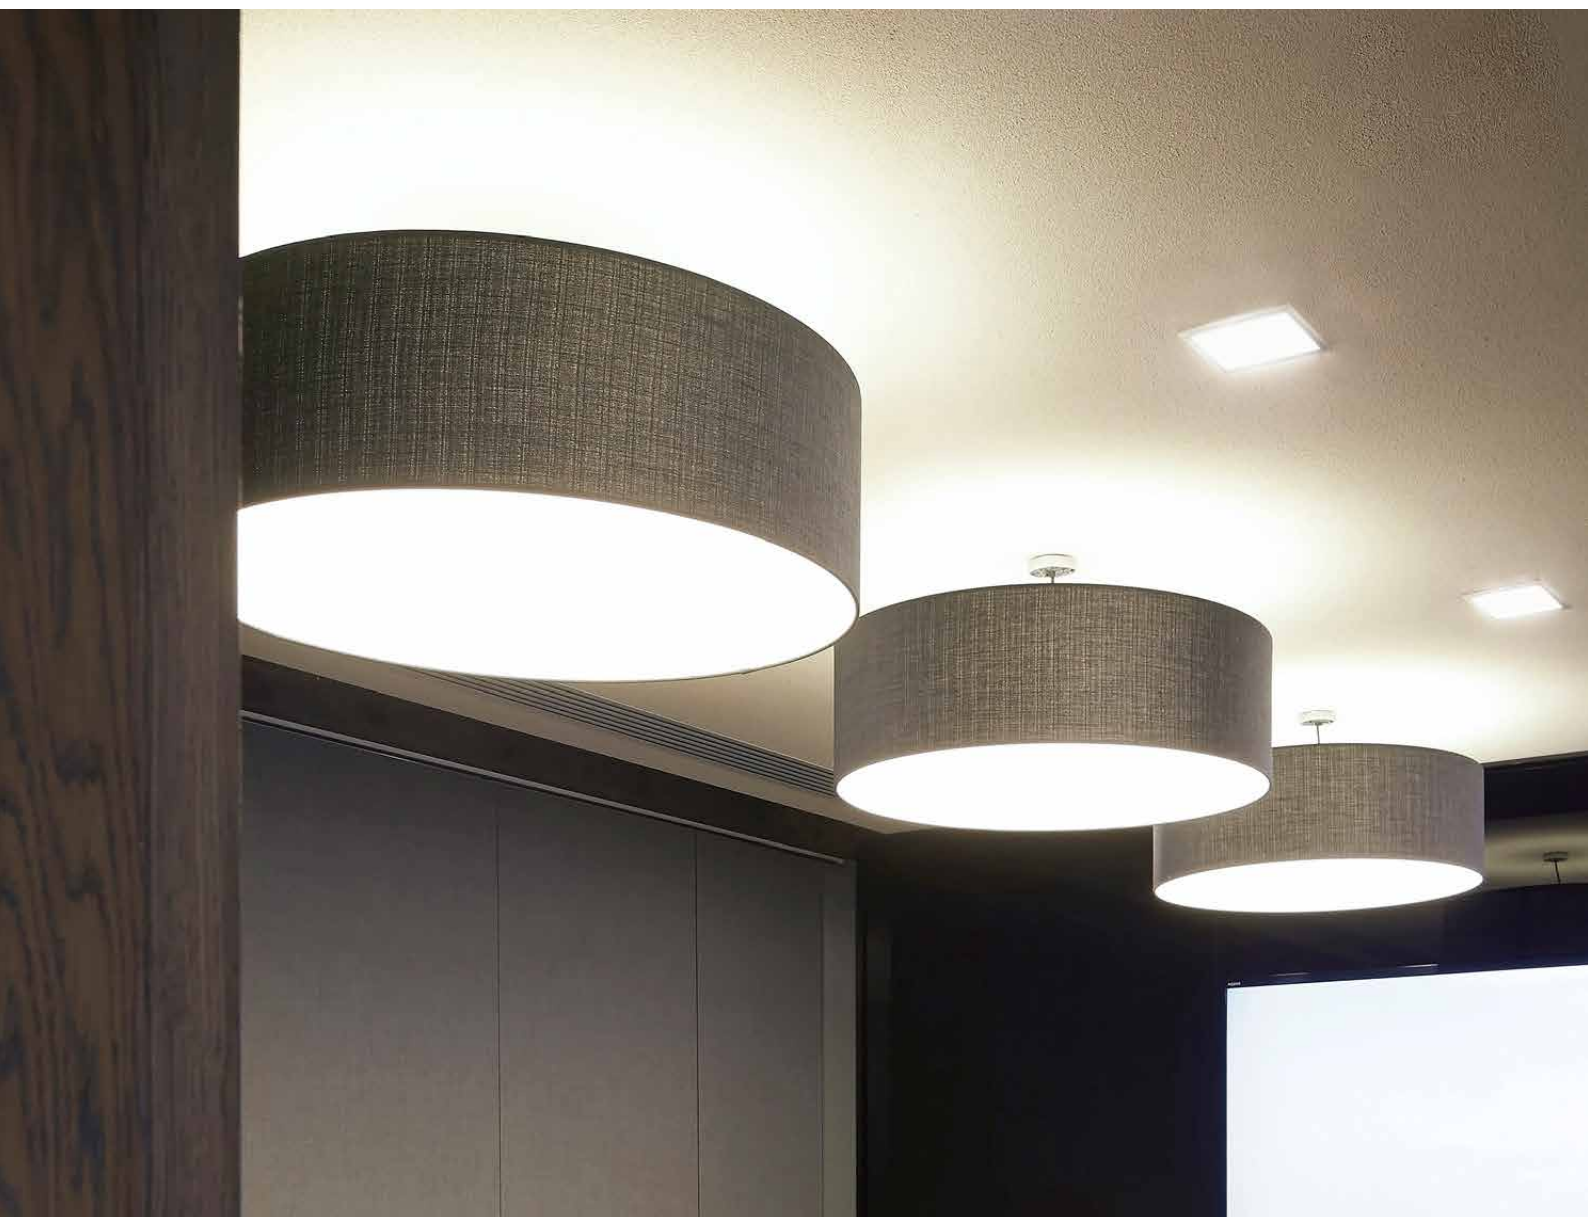

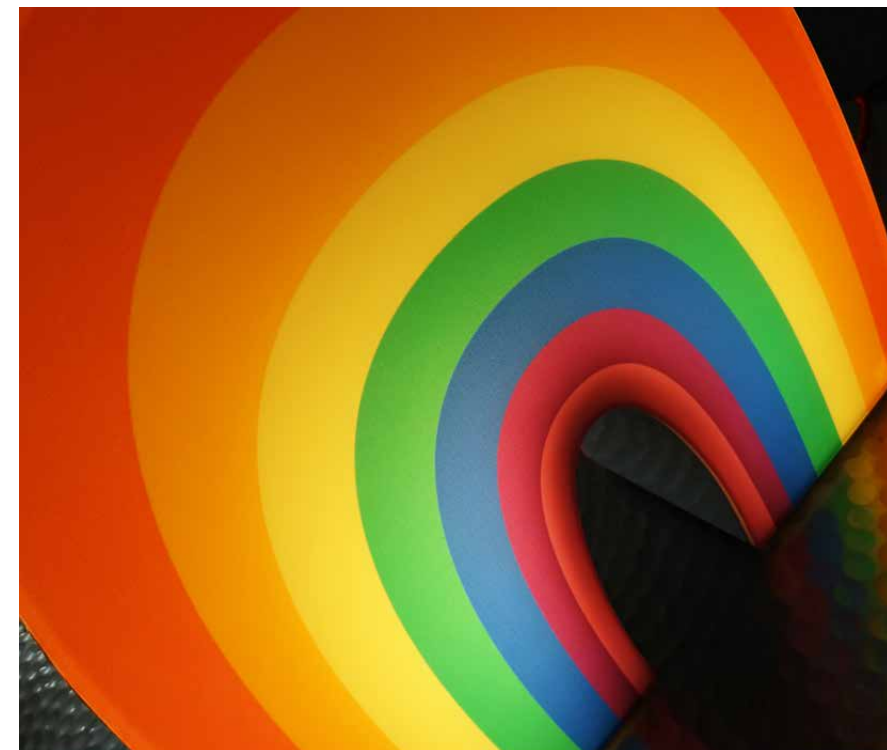

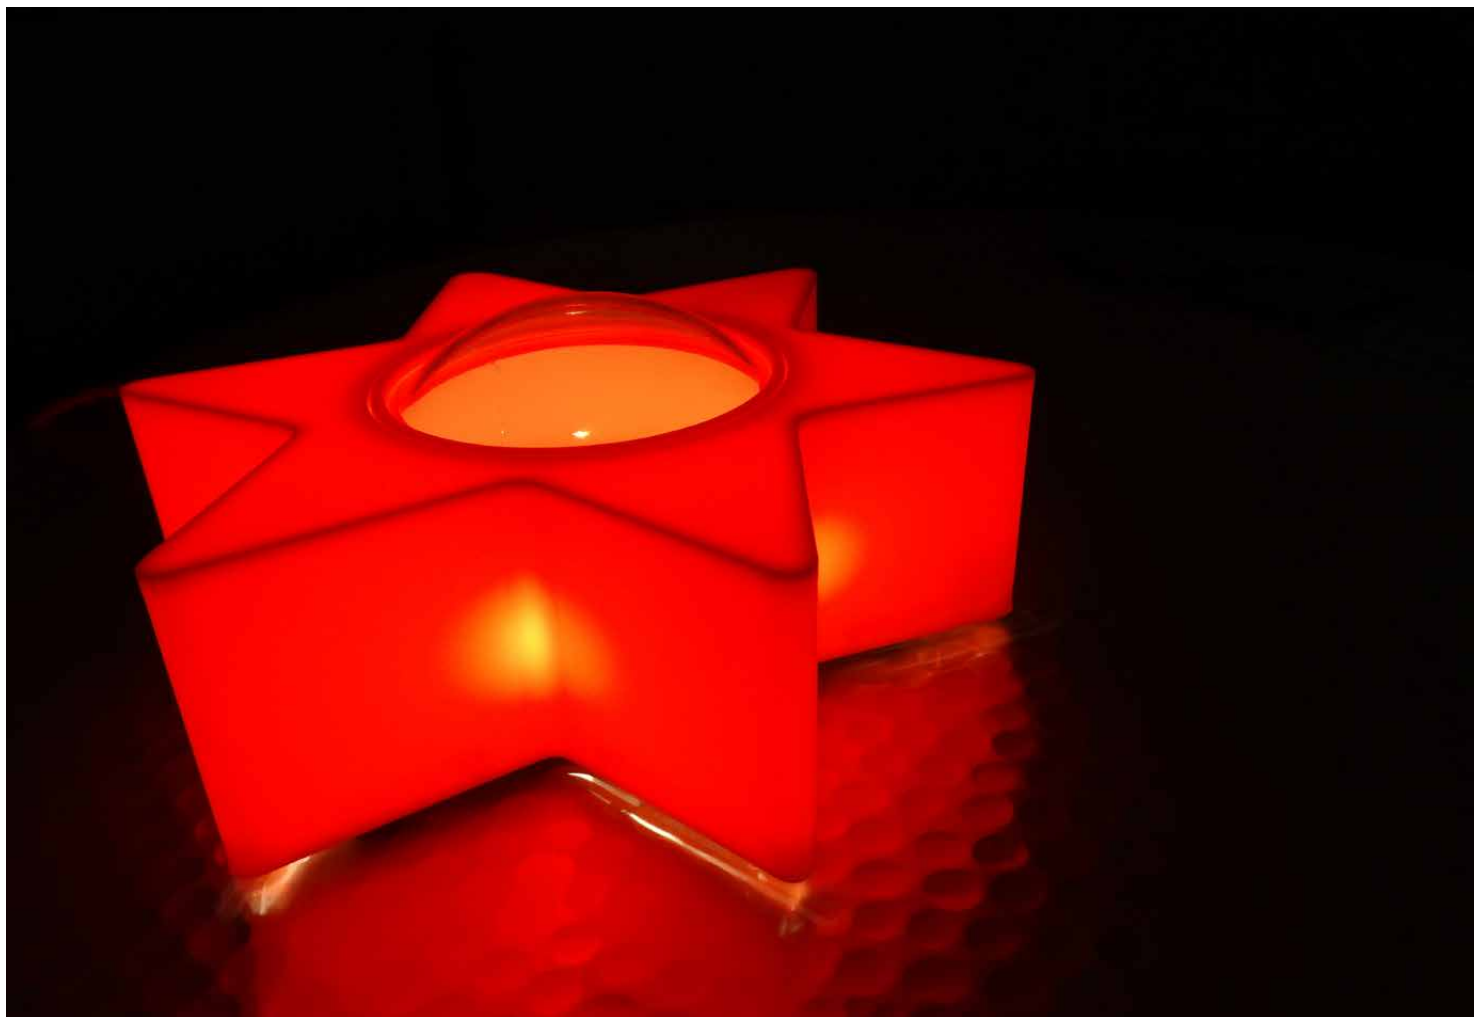

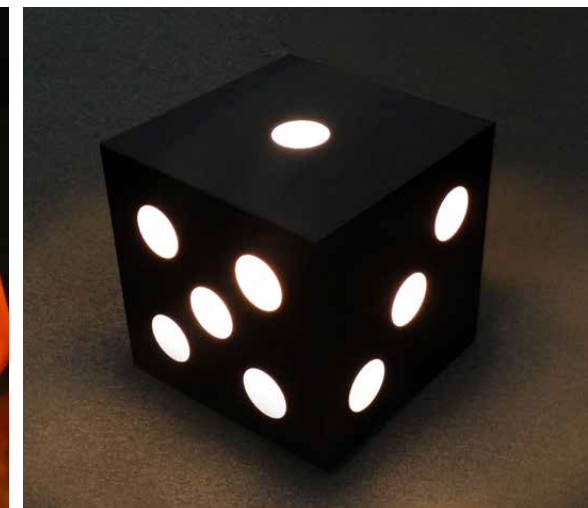

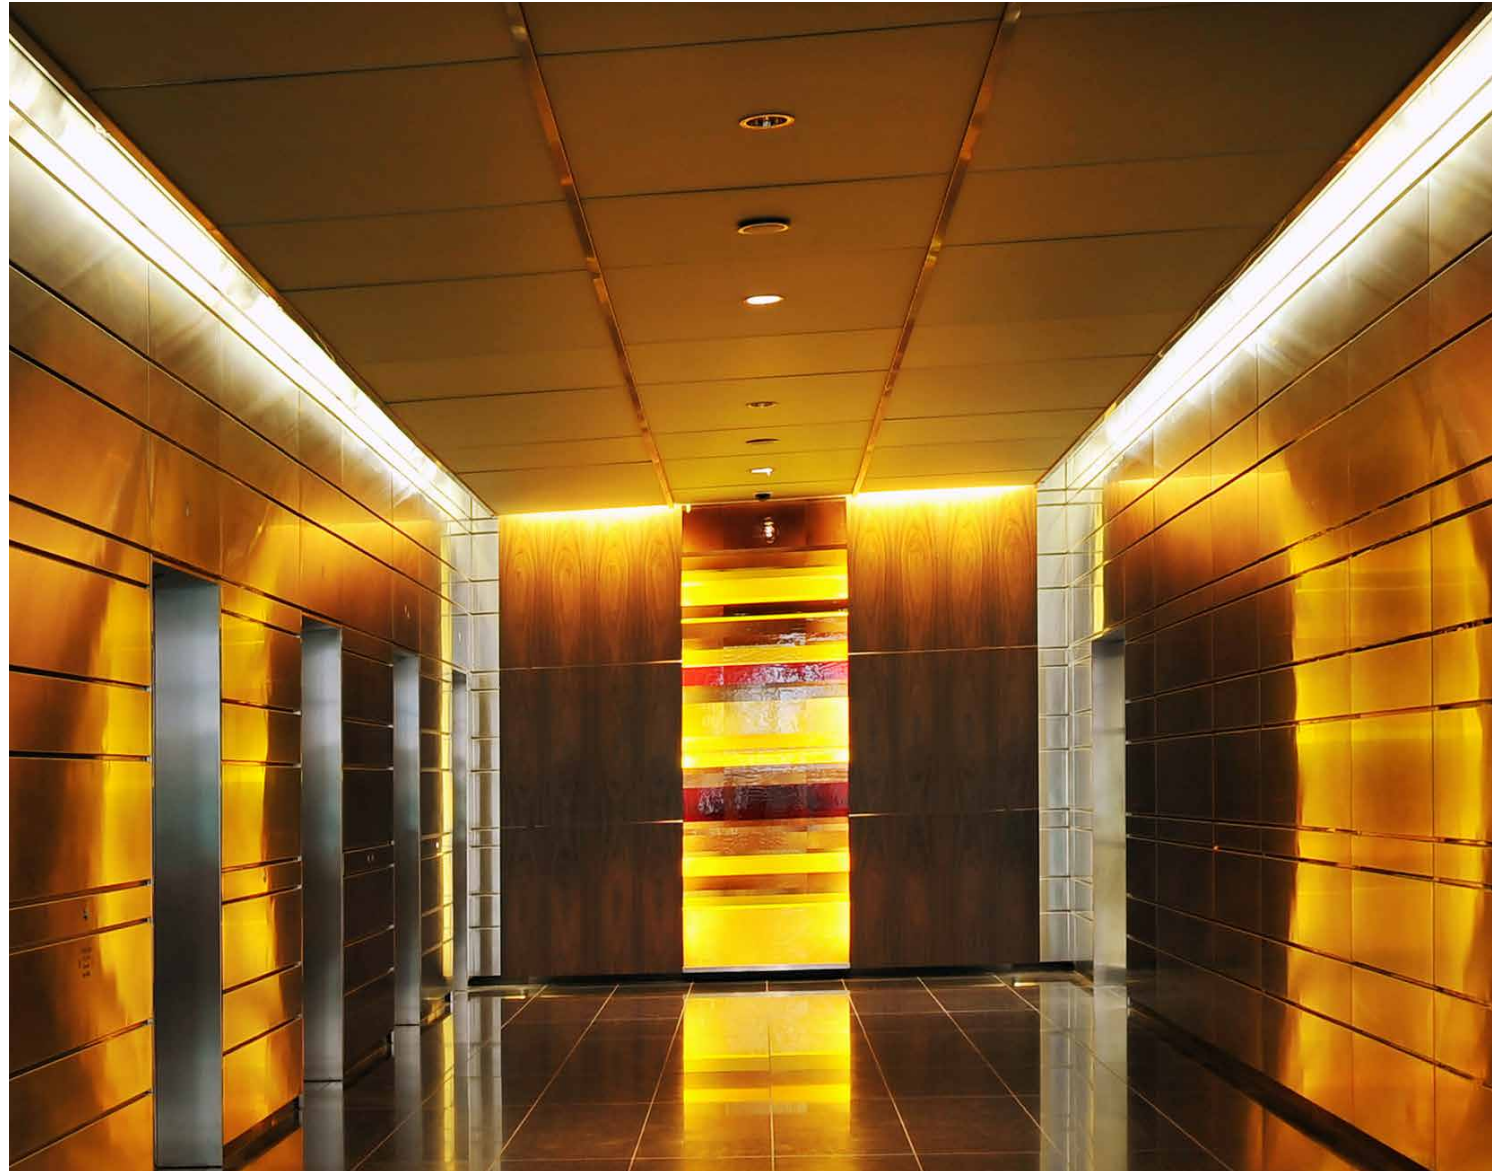

FUTURE Designs and Sparks the childrens charity teamed up to run a competition to 'Design a Light' in order to raise funds and awareness for the amazing work that Sparks support. These handmade luminaires are examples of the lights created.

## INDEX

2	3D PRINTING
3	COPPA
6	LANTERN
8	HASHTAG
