

← **TERENCE WOODGATE**

The Solid Table Light from lighting brand Terence Woodgate features a pure, cylindrical base topped by a hand-blown, acid-etched, opal glass shade. There are two sizes, with the Solid Table Light - Small retaining the same design and proportions but at two-thirds of the size. Both sizes are available with a base of either Carrara or Nero Marquina marble with 'Serpentine Green', a dark green marble, a further option in the small version. The table lights form part of the Solid collection that includes pendants and surface-mounted downlights in a range of natural materials. For more information, visit: terencewoodgate.com

→ **ONE FOOT TALLER**

The Polly and Ethel 3-Drop lighting suspensions sink effortlessly into dining and living areas. In mezzanine spaces and large stairwells they can be seen from above or below offering a diffuse light, without glare as well as a calm aesthetic. The 6-Drop can spiral up further for a tall space, and designing and producing made-to-measure configurations is always a pleasure. Polly and Ethel are also available as single pendants which can be supplied with cable drops, rigid drops or just as diffusers. One Foot Taller's 'Waisted' glass range is just in view. Individually handmade in Scotland, these provide lighting with quality, individuality, weight and elegance for any space. ↑ **ASTRO LIGHTING**

Inspired by the flowing lines of a Mobius Strip, the concrete Dunbar combines architectural purity with a raw material aesthetic. Each product is individually cast producing a robust and authentic product with its own unique finish. astrolighting.com

↑ **JOHN CULLEN LIGHTING**

Our much loved range of high-end downlights have just become that bit easier to specify with two new additions – a fire rated accessory and a twist and lock system. Both will save your electrician time, reducing installation costs for you and your clients. The fire accessory is ideal when fire rating is required for both new builds and refurbishments alike and will maintain a period of fire resistance of 60 minutes as per Building Regulation requirements. We have introduced a unique new twist and lock system will enable the LED engine to be installed in the downlight without the need for a screwdriver. johncullenlighting.com
