## THROWING SHAPES

*Olafur Eliasson's mirror artwork, No future is without a past, at the new Bloomberg European HQ in the City of London. See Light+Tech*

← **HACEL**

Designed and manufactured in the UK by Hacer, the exclusive Explora Halo LED Pendant luminaire is the artistic choice for producing a lighting statement. Displaying a homogenous halo of enlightened luminance, the Explora showcases a translucent yet reflective design. Offering direct and indirect lighting, the Explora Halo is available in three sizes and allows for flexibility in creating inspirational mixed compositions or used as a single, sophisticated focal point to optimise surrounding architecture. As part of the Explora range, Linear Pendants and Wall Lights are also available. [hacer.co.uk](http://hacer.co.uk)

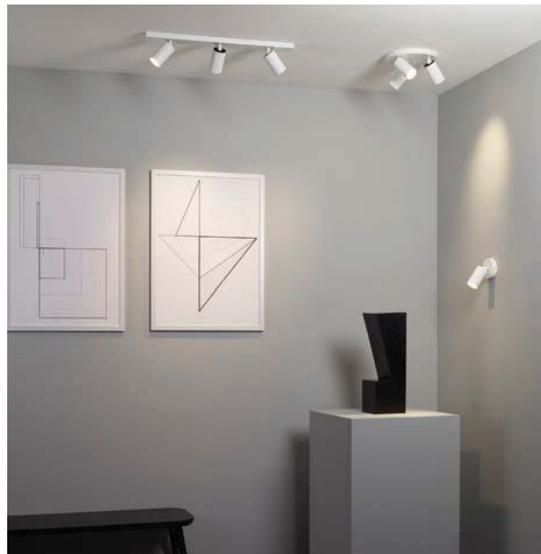

↑ **ONE FOOT TALLER**

Pictured in hair salon Intuition Coiffure, the Ethel 6-Drop Suspension creates a magical glowing feature in the centre of the boutique space. Contemporary lighting designer, One Foot Taller has created the suspended lighting to be adaptable with long spaced-out drops for very high spaces, or 1200mm total drop for rounder central features. The spiral formation offers added visual interest with a different look and light depending on your vantage point within the room. One Foot Taller can produce bespoke larger installations with cable or rigid drops, in a variety of finishes to suit the interior. [onefoottaller.com](http://onefoottaller.com)

→ **ASTRO**

Can is a simple, clean design that complements the space around it, offering both black and white finishes by using an interchangeable bezel. Can produces glare-free illumination as a result of a dedicated recessed LED, with a fully adjustable head to direct light just where it is needed. Spotlight options in the collection cover a range of applications including recessed, track (two options available) and surface mounted variants. [astrolighting.com](http://astrolighting.com)

← **JOHN CULLEN LIGHTING**

Our new miniature 40 downlight range is our punchiest and most compact to date with an impressive size to performance ratio. A miniaturised version of our renowned 69mm bezel downlight range (Polespring, Waterspring etc), the 40 range is 15% smaller with a bezel of just 59mm yet delivers virtually the same level of luminaire lumens. It is over 35% smaller in volume with a reduced depth of 64mm, allowing specification in more spatially demanding environments. The 40 range includes trim or trimless, flush or recessed, square or round and IP or non-IP rated variants to ensure suitability within a wide range of applications.
